

CONFIDENTIAL PRIVATE PLACEMENT MEMORANDUM
of
CARIBBEAN INVESTMENT HOLDINGS LLC.
a USA Company

EIGHT MILLION (8,000,000) SHARES OF CLASS B NON-VOTING SHARES REPRESENTED
BY DIGITAL TOKENS

TOTAL OFFERING AMOUNT: USD \$16,000,000.00 MINIMUM INVESTMENT: USD \$4,000.00

THIS CONFIDENTIAL PRIVATE PLACEMENT MEMORANDUM (THIS “MEMORANDUM” OR “PPM”) IS PROVIDED TO YOU ON A CONFIDENTIAL BASIS SOLELY IN CONNECTION WITH YOUR CONSIDERATION OF AN INVESTMENT IN THE CLASS B SHARES EVIDENCED IN TOKENISED FORM (THE “TOKENS”) OF CARIBBEAN INVESTMENT HOLDINGS LLC, A COMPANY ORGANIZED UNDER THE LAWS OF GRENADA (THE “COMPANY”). DUE TO THE CONFIDENTIAL NATURE OF THIS MEMORANDUM, ITS USE FOR ANY OTHER PURPOSE MIGHT INVOLVE SERIOUS LEGAL CONSEQUENCES. CONSEQUENTLY, THIS MEMORANDUM MAY NOT BE REPRODUCED IN WHOLE OR IN PART, AND MAY NOT BE DELIVERED TO ANY PERSON (OTHER THAN YOUR FINANCIAL ADVISOR) WITHOUT PRIOR WRITTEN CONSENT OF THE COMPANY.

DATED AS OF: MAY 01, 2026

NOTICES TO INVESTORS

THE TOKENS OFFERED HEREBY ARE BEING SOLD ONLY TO A LIMITED NUMBER OF U.S. ACCREDITED INVESTORS AS DEFINED IN RULE 501 OF REGULATION D UNDER THE SECURITIES ACT OF 1933, AS AMENDED (THE "**SECURITIES ACT**"). SUCH EXEMPTIONS LIMIT THE NUMBER AND TYPES OF INVESTORS TO WHICH THE OFFERING MAY BE MADE AND RESTRICT SUBSEQUENT TRANSFERS OF THE SECURITIES BEING OFFERED. THE TRANSFERABILITY OF THESE SECURITIES ALSO MAY BE RESTRICTED BY STATE AND FOREIGN SECURITIES LAWS. THESE SECURITIES MAY NOT BE RESOLD OR OTHERWISE DISPOSED OF BY AN INVESTOR UNLESS, IN THE OPINION OF COUNSEL TO THE COMPANY, REGISTRATION UNDER FEDERAL AND APPLICABLE STATE SECURITIES LAWS IS NOT REQUIRED OR COMPLIANCE IS MADE WITH THE REGISTRATION REQUIREMENTS OF SUCH LAWS.

THESE TOKENS HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE SECURITIES AND EXCHANGE COMMISSION, ANY STATE SECURITIES COMMISSION OR ANY OTHER REGULATORY AUTHORITY, NOR HAVE ANY OF THE FOREGOING AUTHORITIES PASSED UPON OR ENDORSED THE MERITS OF THIS OFFERING OR THE ACCURACY OR ADEQUACY OF THIS MEMORANDUM. ANY REPRESENTATION TO THE CONTRARY IS CRIMINAL OFFENSE.

THIS MEMORANDUM DOES NOT CONSTITUTE AN OFFERING OR SOLICITATION BY THE COMPANY OR ANY OTHER PERSON IN ANY JURISDICTION IN WHICH SUCH AN OFFERING OR SOLICITATION IS UNLAWFUL OR UNAUTHORIZED.

NEITHER THE DELIVERY OF THIS MEMORANDUM NOR ANY OFFERS OR SALES MADE HEREUNDER SHALL UNDER ANY CIRCUMSTANCES CREATE AN IMPLICATION THAT THERE HAS BEEN NO CHANGE IN THE MATTERS DISCUSSED HEREIN SINCE THE DATE HEREOF. HOWEVER, IN THE EVENT OF ANY MATERIAL CHANGE, THIS MEMORANDUM WILL BE AMENDED OR SUPPLEMENTED ACCORDINGLY.

INVESTMENT IN THE TOKENS INVOLVES A HIGH DEGREE OF RISK, AND CONSEQUENTLY THE PURCHASE OF THE COMPANY'S TOKENS SHOULD BE CONSIDERED ONLY BY PERSONS WHO HAVE SUBSTANTIAL FINANCIAL RESOURCES AND NO NEED FOR LIQUIDITY FOR THEIR INVESTMENT, WHO HAVE SUFFICIENT NET WORTH AND WHO CAN BEAR THE RISK OF A COMPLETE LOSS OF THEIR INVESTMENT.

NO PERSON HAS BEEN AUTHORIZED TO MAKE ANY REPRESENTATIONS, OR GIVE ANY INFORMATION, WITH RESPECT TO THE COMPANY, ITS PROPOSED BUSINESS, THE SHARES, OR THE CONSEQUENCES, RISKS OR BENEFITS OF AN INVESTMENT IN THE TOKENS, EXCEPT FOR THE INFORMATION CONTAINED HEREIN. PROSPECTIVE INVESTORS SHOULD NOT RELY ON ANY INFORMATION THAT IS NOT CONTAINED IN THIS MEMORANDUM, THE FILED DISCLOSURE DOCUMENTS BEING DELIVERED HERewith, OR ANY EXHIBIT THERETO. ANY STATEMENT MADE HEREIN WITH RESPECT TO ANY DOCUMENT FILED AS AN EXHIBIT TO A FILED DISCLOSURE DOCUMENT IS QUALIFIED BY REFERENCE THERETO. THE COMPANY HEREBY EXTENDS TO EACH PROSPECTIVE INVESTOR (AND TO HIS PURCHASER REPRESENTATIVE, IF ANY) THE OPPORTUNITY, PRIOR TO THE CONSUMMATION OF THE PURCHASE OF ANY TOKENS BY SUCH INVESTOR, TO ASK QUESTIONS OF, AND RECEIVE ANSWERS FROM, THE COMPANY CONCERNING THIS OFFERING AND TO OBTAIN ANY ADDITIONAL INFORMATION TO THE EXTENT THE COMPANY POSSESSES THE SAME OR CAN ACQUIRE IT WITHOUT UNREASONABLE EFFORT OR EXPENSE, IN ORDER TO VERIFY THE ACCURACY OF THE INFORMATION SET FORTH HEREIN. HOWEVER, ALL SUCH ADDITIONAL INFORMATION MUST BE IN WRITING AND IDENTIFIED AS SUCH BY THE COMPANY'S AUTHORIZED REPRESENTATIVE.

THIS MEMORANDUM HAS BEEN PREPARED SOLELY FOR THE BENEFIT OF PROSPECTIVE INVESTORS INTERESTED IN THE PROPOSED OFFERING OF TOKENS AND CONSTITUTES AN OFFER ONLY IF THE NAME OF AN OFFEREE APPEARS IN THE APPROPRIATE SPACE ON THE COVER. ANY REPRODUCTION OR FURTHER DISTRIBUTION OF THIS MEMORANDUM, IN WHOLE OR IN PART, IS PROHIBITED.

INFORMATION CONTAINED IN THIS MEMORANDUM HAS BEEN OBTAINED FROM THE COMPANY AND FROM OTHER SOURCES DEEMED RELIABLE BY THE COMPANY. SUCH INFORMATION NECESSARILY INCORPORATES SIGNIFICANT ASSUMPTIONS AS TO FACTUAL AND OTHER MATTERS.

ANY REPRODUCTION OR DISTRIBUTION OF THIS MEMORANDUM, IN WHOLE OR IN PART, OR THE DISCLOSURE OF ITS CONTENTS, WITHOUT THE PRIOR WRITTEN CONSENT OF THE COMPANY, IS PROHIBITED. ANY PERSON ACTING CONTRARY TO THE FOREGOING RESTRICTIONS MAY PLACE HIMSELF OR HERSELF AND THE COMPANY IN VIOLATION OF FEDERAL OR STATE SECURITIES LAWS.

THE OFFEREE, BY ACCEPTING THE DELIVERY OF THIS MEMORANDUM, AGREES TO RETURN THIS MEMORANDUM AND ALL ENCLOSED DOCUMENTS TO THE COMPANY IF THE OFFEREE DOES NOT AGREE TO PURCHASE ANY OF THE TOKENS OFFERED HEREBY. THE OFFEREE ALSO AGREES BY ACCEPTING DELIVERY OF THIS MEMORANDUM NOT TO DISCLOSE ANY OF THE INFORMATION CONTAINED HEREIN TO ANY OTHER PERSON.

NO PERSON HAS BEEN AUTHORIZED TO MAKE REPRESENTATIONS OR TO GIVE ANY INFORMATION WITH RESPECT TO THE OFFERING OF THIS OFFERING OR THE OPERATIONS OF THE COMPANY, EXCEPT FOR THE INFORMATION CONTAINED IN THIS MEMORANDUM, IN THE FILED DISCLOSURE DOCUMENTS, THE TERM SHEET, AND IN THE SUBSCRIPTION, AGREEMENT ACCOMPANYING THIS MEMORANDUM.

NO OFFEREE WILL BE ACCEPTED AS A SUBSCRIBER WHO DOES NOT MAKE THE REPRESENTATIONS SET FORTH IN THE SUBSCRIPTION AGREEMENT ACCOMPANYING THIS MEMORANDUM, INCLUDING THE REPRESENTATION THAT SUCH OFFEREE IS ACQUIRING THE TOKENS FOR INVESTMENT AND NOT WITH A VIEW TO RESALE OR DISTRIBUTION THEREOF. INVESTORS ALSO WILL BE REQUIRED TO REPRESENT THAT THEY ARE FAMILIAR WITH AND UNDERSTAND THE TERMS OF THIS OFFERING.

THE COMPANY RESERVES THE RIGHT TO REFUSE TO SELL THE TOKENS BEING OFFERED HEREBY TO ANY PERSON OR ENTITY, FOR CAUSE OR WITHOUT CAUSE, AND TO WITHDRAW THE OFFERING AT ANY TIME PRIOR TO ACCEPTANCE OF SUBSCRIPTIONS.

CERTAIN STATEMENTS CONTAINED IN THIS MEMORANDUM CONSTITUTE "FORWARD-LOOKING STATEMENTS," WHICH CAN BE IDENTIFIED BY THE USE OF FORWARD-LOOKING TERMINOLOGY SUCH AS "MAY," "WILL," "SHOULD," "EXPECT," "ANTICIPATE," "ESTIMATE," "AIM," "PROJECT," "TARGET," "INTEND," "CONTINUE" OR "BELIEVE," THE NEGATIVES THEREOF, OTHER VARIATIONS THEREON OR OTHER COMPARABLE TERMINOLOGY. ACTUAL EVENTS OR RESULTS, OR THE ACTUAL RETURN ON THE SECURITIES, MAY DIFFER MATERIALLY FROM WHAT IS REFLECTED OR CONTEMPLATED IN SUCH FORWARDLOOKING STATEMENTS. AS USED HEREIN, "\$" OR "DOLLARS" MEANS

U.S. DOLLARS, AND "BUSINESS DAY" MEANS ANY DAY EXCEPT A SATURDAY, SUNDAY, OR OTHER DAY ON WHICH COMMERCIAL BANKS IN NEW YORK CITY ARE AUTHORIZED BY LAW TO CLOSE.

THIS MEMORANDUM IS SUBJECT TO AMENDMENT AND SUPPLEMENTATION AS APPROPRIATE. WE DO NOT INTEND TO UPDATE THE INFORMATION CONTAINED IN THE OFFERING DOCUMENTS FOR ANY INVESTOR WHO HAS ALREADY MADE AN INVESTMENT. WE MAY UPDATE THE INFORMATION CONTAINED HEREIN FROM TIME TO TIME AND PROVIDE SUCH UPDATED DOCUMENT TO POTENTIAL INVESTORS BUT UNDERTAKE NO OBLIGATION TO PROVIDE SUCH UPDATED DOCUMENTS TO AN INVESTOR WHO HAS ALREADY MADE HIS OR HER INVESTMENT.

PERSPECTIVE INVESTORS ARE NOT TO CONSTRUE THE CONTENTS OF THIS MEMORANDUM AS LEGAL, BUSINESS, TAX, OR IMMIGRATION ADVICE. EACH PROSPECTIVE INVESTOR SHOULD CONSULT HIS OR HER OWN ADVISORS AS TO THE LEGAL, BUSINESS, TAX, IMMIGRATION AND RELATED MATTERS CONCERNING THIS INVESTMENT. IF THIS MEMORANDUM AND/OR ANY OF THE FILED DISCLOSURE DOCUMENTS CONTAIN PROVISIONS OF CERTAIN OTHER DOCUMENTS, REFERENCE IS MADE HEREBY TO THE ACTUAL DOCUMENTS (COPIES OF WHICH WILL BE MADE AVAILABLE TO PROSPECTIVE INVESTORS UPON REQUEST) FOR COMPLETE INFORMATION CONCERNING THE RIGHTS AND OBLIGATIONS OF THE PARTIES THERETO. ALL SUCH SUMMARIES ARE QUALIFIED IN THEIR ENTIRETY BY THIS REFERENCE.

MORE INFORMATION

This Memorandum contains information on the Company. While we believe the information contained in this Memorandum is accurate, this Memorandum is not meant to contain an exhaustive discussion regarding the Company. We cannot guarantee a prospective investor that the abbreviated nature of this Memorandum will not omit to state a material fact, which a prospective investor may believe to be an important factor in determining if an investment in the Tokens offered hereby is appropriate for such investor. As a result, prospective investors are required to undertake their own due diligence of the Company, our current and proposed business and operations, our management, and our financial condition to verify the accuracy and completeness of the information we are providing in this Memorandum. An investment in the Tokens is suitable only for investors who have the knowledge and experience to independently evaluate the Company, our business, and prospects.

Each offeree may, if he, she or it so desires, make inquiries of appropriate members of our management with respect to our business or any other matters set forth herein, and may obtain any additional information which such person deems to be necessary in order to verify the accuracy of the information contained in this Memorandum (to the extent that we possess such information or can acquire it without unreasonable effort or expense) upon the execution and delivery of an agreement to maintain the confidentiality of such information for the benefit of the Company. Any such inquiries or requests for additional information or documents should be made in writing to us. Requests and inquiries regarding this Memorandum should be directed to:

CARIBBEAN INVESTMENT HOLDINGS LLC.

EXECUTIVE SUMMARY

This confidential private placement memorandum (as it may be amended and supplemented from time to time, this "**Memorandum**") is being furnished in connection with the offer and sale (the "**Offering**") of shares of Class B Non-Voting Stock (the "**Shares**") of CARIBBEAN INVESTMENT HOLDINGS LLC., a Company incorporated under the laws of the State of California USA (the "**Company**"). The Shares will be represented by digital tokens referred to as CIH Token (the "**Tokens**").

The total offering amount is \$16,000,000 from total issuance of Eight Million (8,000,000) Shares/Tokens at purchase price of \$2.00 per Share. Minimum investment amount is \$4,000.00, or Two Thousand (2,000) Shares/Tokens (the "**Minimum Investment**"). The Company may, in its sole discretion, accept subscriptions in lesser amounts. This Offering will stay open until all Tokens have been subscribed for, but the Company may, in its sole discretion, close this Offering when the Minimum Investment has been subscribed for.

The proceeds from the Offering will be invested in GRENADA LIFESTYLE PROPERTIES LTD, a private real estate investment company registered in Grenada (the "**Property Company**") that is developing the Grenada Lifestyle Cosmetic Surgery Clinic, Hotel, and SPA, to be constructed on the Island of Grenada in the Caribbean, consisting of a lifestyle cosmetic surgery clinic, a hotel for surgery after-care, luxury villas, an executive spa, an eye and aesthetic dental clinics (collectively, the "**Project**" or "**Resort**"), catering for local and international patients seeking elective cosmetic surgery. Rental income from the Resort is expected to generate an annual return of five to eight percent (5- 8%) for Token holders of the Company.

Each purchaser of the Tokens will become a shareholder of the Company (a "**Shareholder**") having the rights and obligations as provided under the Articles of Incorporation of the Company, as amended from time to time (the "**Articles**").

The Offering is being made on a "Best Efforts" basis, which means there is no guarantee that any of the Tokens will be sold or that a sufficient number of Tokens will be sold to fulfill the Company's investment plan.

The Company is managed by the Board of Directors (the "**Board**"), currently consisting of Mr. Gavin Stassen and Mr. Ricky Smith (each a "**Director**").

In connection with this Offering, the Company shall engage NatraCoin Ltd., a fintech Company which owns a digital platform in Denmark (the "**Transfer Agent**"), supported by the DigiShares platform, for transfer of funds and issuance of Tokens, in accordance with the terms of the Subscription Agreement (the "**Subscription Agreement**"). Prospective subscribers to this Offering will be required to verify their identity and financial status, which upon confirmation from the Transfer Agent, will grant them the ability to purchase the Tokens.

Investing in the Tokens involves a degree of risk. You should carefully consider the section entitled "RISK FACTORS" of this Memorandum prior to purchasing the Tokens.

Information in this Memorandum is presented as of the date hereof. This Memorandum may be supplemented from time to time to set forth material subsequent events or information. Neither the delivery of this Memorandum nor any sale made hereunder shall, under any circumstances, create an implication that there has been no change in our affairs since the date hereof. Our business, financial condition, liquidity, results of operations and prospects may have changed since those dates.

Because the Tokens represent Shares of the Company, references in this Memorandum to the Tokens or CIH Tokens should be read as references to the Shares, and vice versa, unless otherwise specified or the context so requires.

The Company	CARIBBEAN INVESTMENT HOLDINGS LLC., a USA LLC
Registered Agent of the Company	
Address of the Company	Los Angeles, California

The Executive Summary provided in this section is qualified in its entirety by the more detailed information included elsewhere in this Memorandum, as well as the various organizational documents and other Offering Documents as well as agreements referenced in this Memorandum. This Executive Summary is being provided on a confidential basis shall not constitute an offer to sell or the solicitation of any offer to buy which may be made only at the time a qualified offeree receives the complete Memorandum, which contains important information (including expenses and risk factors) and only in those jurisdictions where permitted by law. In the case of any inconsistency between the descriptions or terms in this section and the Memorandum, the Memorandum shall control. This Executive Summary does not contain or summarize all the information about the Company and the Tokens being offered which may be material or important to you in making your investment decision. An investment in Tokens is speculative and involves a high degree of risk. You should read this entire Memorandum, including the "Risk Factors", as well as any appendixes or additional information provided to you alongside this Memorandum before making any investment decisions regarding the Tokens.

“Transfer Agent” means NatraCoin Ltd., a duly incorporated fintech company, the transfer agent of the Company, designated by Senior Management that is facilitating the Offering on behalf of the Company with regards to without limitation, clearance and settlement of the securities transactions, recording changes in ownership, accreditation of investors, maintenance of corporate security holder records, and cancellation and/or issuance of the securities in the form of the Tokens.

“Voting Shareholders” means the holders of Class A Management Shares.

[Memorandum Continues On Following Pages]

OFFERING SUMMARY

The following is a summary of certain of the principal terms governing an investment in CARIBBEAN INVESTMENT HOLDINGS LLC. This summary is not complete and is qualified in its entirety by reference to the more detailed information set forth elsewhere in this Memorandum and by the terms and conditions of the Articles of Incorporation of the Company as amended from time to time. Prospective investors are urged to read the entire aforementioned documents and to seek the advice of their own counsel, tax consultants and business advisors with respect to the legal, tax and business aspects of investing in the Company.

Issuer:	CARIBBEAN INVESTMENT HOLDINGS LLC., a company incorporated under the laws of the State of Los Angeles, California (the “Company”).
Management:	The Company is managed by the Board of Directors (the “Board”), currently consisting of Mr. Gavin Stassen and Mr. Ricky Smith (each a “Director”).
Offering:	The Company is offering Eight Million (8,000,000) Shares of Class B Non-Voting Stock (the “Shares”) for sale pursuant to Reg D 506(c) exemption to registration promulgated under the Securities Act. The Shares will be represented by Polygon 1404 digital tokens, referred to as CIH Tokens (the “Tokens”). Upon execution of a Subscription Agreement and acceptance of the same by the Company, each purchaser of the Tokens will become a Shareholder of the Company (“Shareholder”), having the rights and obligations as provided under the Articles of Incorporation of the Company, as amended from time to time (the “Articles”).
Investment Program:	The proceeds of the Offering will be invested in GRENADA LIFESTYLE PROPERTIES LTD., a private healthcare real estate investment company that is developing the Grenada Lifestyle Cosmetic Surgery Clinic, Hotel, and SPA, consisting of a lifestyle cosmetic surgery clinic, a hotel for surgery after-care, luxury villas, an executive spa, an eye and aesthetic dental clinics (collectively, the “Resort”) in Grenada, catering for local and international patients seeking elective cosmetic surgery. Rental income from the Resort will secure returns expected to generate an annual return of five to eight percent (5-8%) for Shareholders of the Company.
Use of Proceeds:	Proceeds of this Offering through CARIBBEAN INVESTMENT HOLDINGS LLC will be invested in GRENADA LIFESTYLE PROPERTIES LTD., which in turn will use the proceeds for the purchase of land, development of the Resort, and other fees and expenses as required. This also serves to satisfy that GRENADA LIFESTYLE PROPERTIES LTD., as the property developer, is required to contribute to at least twenty percent (20%) of the total costs of construction, excluding purchase of land, before the Resort, as a real estate project, can be approved and accepted into the CBI program.
Securities Offered:	Shares of Class B Non-Voting Shares of the Company, represented by Tokens.
Share Price:	USD \$2.00 per Token
Minimum Investment:	USD \$4,000.00 or Two Thousand (2,000) Tokens
Maximum Offering Amount:	\$16,000,000.00

Offering Period:	This Offering will stay open until all Shares have been subscribed for. But the Company may, in its sole discretion, close this Offering when Four Thousand (4,000) Shares have been subscribed for.
Management Fee:	Market-related transaction fees compliant with SEC.
Currencies and Cryptocurrencies Accepted:	USD, USDC, USDT, BTC, ETH
Smart Contract:	The Tokens are issued electronically on the smart contract standard on the Polygon Blockchain.
Eligible Investors:	The Tokens are being offered only to “accredited investors” as that term is defined in Rule 501(a) of Regulation D promulgated under the Securities Act. Prospective purchasers of Tokens who are U.S. Persons as such term is defined under the Securities Act will be required to verify their status as accredited investors through the provision of two years of tax or wage statements, brokerage or bank statements, confirmation by certain third parties, and/or certain other methods deemed acceptable by the Company. The Tokens will not be registered under the Securities Act or the securities laws of any state or any other jurisdiction, nor is any such registration contemplated. An investment in the Tokens is suitable only for investors who have adequate means of providing for current needs and personal contingencies, can bear the economic risk of a total loss of their investment, and have no need for liquidity in the investment. Investors will be required to make representations to the foregoing effect to the Company as a condition to acceptance of their subscription.
Target Return:	Five to eight percent (5-8%) per annum.
Lock-Up Period:	The Tokens cannot be sold, pledged, or otherwise transferred, and the Company shall not recognize and shall issue stop-transfer instructions to its Transfer Agent with respect to any such transfer and will not recognize such transfer, except upon the conditions specified in the Purchase Agreement, the Organizational Documents and in compliance with U.S. State and federal securities and any other applicable laws. Additionally, Tokens may not be transferred within the first three hundred sixty-six (366) days of purchase and only in compliance with applicable laws and the Organizational Documents.
Term:	The Offering is expected to close upon the earlier of: (i) twelve (12) months from the date the Offering commences; or (ii) the date on which the Maximum Offering Amount is subscribed for. The Company may, at any time in its sole discretion, suspend or terminate the Offering of the Tokens or allow for additional closings.
Allocation and Distributions of Profits:	The Board currently intends to distribute net profits of the Company on a quarterly basis in the form of USD and/or cryptocurrencies upon stabilization of the Project. All profit distribution shall be allocated to the Shareholders’ capital accounts in proportion to their respective ownership of Tokens. There is no guarantee that the Company will achieve profitability or distribute net profits with any certain frequency.
Voting Rights:	The Tokens have no voting rights.
Redemption:	The Tokens have no redemption rights for three (3) years after purchase.

Preemption:	The Tokens have no preemption rights.
Liquidation Preference:	Class B Non-Voting Shares shall have 1x liquidation preference over Class A Management Shares.
Distribution In-Kind:	Distributions, if any, may only take the form of cash.
Offering Expenses:	Will be paid by the Company out of the proceeds of this Offering.
Other Expenses:	The Company shall pay for all of its ordinary operating and other expenses, including, but not limited to, investment-related expenses (such as brokerage commissions, clearing and settlement charges, custodial fees, interest expenses, expenses relating to consultants, brokers or other professionals or advisors who provide research, advice or due diligence services with regard to Investments, appraisal fees and expenses and investment banking expenses); research and due diligence costs and expenses (including fees for news, quotation and similar information and pricing services); legal expenses (including, without limitation, the costs of on-going legal advice and services, blue sky filings, all costs and expenses related to or incurred in connection with the Board's compliance obligations under applicable federal and/or state laws arising out of its relationship to the Company, as well as extraordinary legal expenses, such as those related to litigation or regulatory investigations or proceedings); the management and transaction fee; accounting fees and audit expenses; administrative fees; tax preparation expenses and any applicable tax liabilities (including transfer taxes and withholding taxes); other governmental charges or fees payable by the Company; costs of printing and mailing reports and notices; expenses of any meetings of the Board or the Shareholders; director and officer and/or errors and omissions liability insurance premiums or fiduciary liability insurance premiums for directors and officers, as each may determine in its sole discretion. As an investor in the Company, each Shareholder bears its proportionate share of the expenses of the Company.
Limitation of Liability:	Shareholders are not responsible for the debts or obligations of the Company beyond the amount of their investment in the Company.
Removal of Directors:	Class B Non-Voting Shares may only remove the Directors in certain circumstances in accordance with the Organizational Documents.
No Registration Rights:	The Tokens have not been and will not be registered by any non-U.S. or U.S. federal, state, provincial or territorial laws or with any securities authority of the foregoing.
Transfer Restrictions:	Tokens purchased by US "accredited investors" as the term is defined under Regulation D of the Securities Act may not be resold or otherwise transferred unless such transfer is registered under the Securities Act or exempt from registration.
Custody:	CARIBBEAN INVESTMENT HOLDINGS LLC. will be the custodian of all proceeds received immediately upon subscription.
Administrator/ Transfer Agent:	NatraCoin Ltd., with tech support from the DigiShares platform.
Fiscal Year:	The Company's fiscal year shall end on December 31.

Reports:	The Company shall provide audited annual financial statements to its Shareholders within one hundred twenty (120) days of the end of each fiscal year.
Tax Considerations:	Each prospective investor is advised to consult its own tax advisor as to the tax consequences of an investment in the Company. See “Tax Considerations.”
Risk Factors:	An investment in the Company involves substantial risk, including the risk of loss of a substantial portion, or all, of a Shareholder’s investment. Additionally, there exist certain conflicts of interest, which could pose risk to an investment in the Company as well. See “Risk Factors” and “Conflicts of Interest” for a more detailed discussion of the risks of an investment in the Tokens.
Conflicts of Interest:	The Directors and other executives of the Company may manage and render services to other private investment entities and accounts, some of which do or may have investment strategies that are substantially similar or identical to those of the Company. As a result, they may allocate their time, as well as investment opportunities, between the Company, and such other entities or accounts. They are required to devote only such amount of time to the Company as they, in their discretion, deem necessary, and may also devote a substantial portion of their time and attention to other entities, accounts, investments and activities.
Amendment to Articles of Incorporation:	As described in the Organizational Documents.
Subscription Procedure:	Persons interested in subscribing for Tokens will be furnished and required to complete and return to the Board, a Subscription Agreement and certain other subscription documents that may be necessary to confirm eligibility to purchase Tokens in this Offering. Onboarding and subscription process will be managed by the Transfer Agent. See “Subscription Procedure” for details.

BUSINESS

GRENADA LIFESTYLE PROPERTIES LTD. is a private healthcare real estate investment company based in the State of Grenada (the “**Property Company**”). The Property Company is planning to develop the premier Grenada Lifestyle Cosmetic Surgery Clinic, Hotel, and SPA,, (the “**Project**” or “**Resort**”) consisting of a cosmetic surgery clinic, a hotel for post-surgery care, luxury villas, an executive spa, an eye and aesthetic dental clinics and catering for local and international patients seeking elective cosmetic surgery, in a relaxed, idyllic Caribbean Island environment. The Resort is also designed to be accepted into the Grenada Citizenship by Investment (“**CBI**”) program, under which eligible shareholders of the Company with investment of at least \$220,000 can apply to obtain Grenadian citizenship, subject to other fees, requirements, government’s approval and five (5) year holding period. Total costs of development of the Resort, including procurement of land and miscellaneous fees and expenses, are projected to be approximately Ninety-Four Million (\$94,000,000.00) dollars, of which Sixteen Million (\$16,000,000.00) dollars is expected to be raised in this Offering by CARIBBEAN INVESTMENT HOLDINGS LLC. and the rest will be secured by the CBI other fundings and commitments.

About Grenada

Grenada is a relatively small island on the southern end of the Lesser Antilles islands in the Caribbean Sea. It features a number of high-end hotel resorts that have been popular with European and American tourists. Measuring 344 km², it is composed of three key islands: Grenada and its sister islands Carriacou and Petite Martinique. Each is beautiful and rich in culture, historic sites, fresh culinary delights, and much more. Carriacou is only a 90-minute boat ride from St. George’s, the nation’s capital city.

Grenada’s proximity to the Equator ensures a year-round tropical climate, with average temperatures ranging between 23 and 28 °C. Its cooling trade winds offer very comfortable conditions.

Grenada was a French and British colony but gained independence from the United Kingdom on February 7, 1974.

Grenada’s population is highly educated and has a very high literacy rate. St George’s University hosts 7,000 students from over 140 countries, offers faculties of Medicine and Veterinary Science, and has been operating for thirty-five years. In addition, a full medical teaching hospital will be developed in the near future.

Grenada is a member state of the Caribbean Community (“**CARICOM**”), an intergovernmental organization of 15 member states throughout the Caribbean, and subscribes to the CARICOM treaty. Other member states include Bahamas, Barbados, Belize, Dominica, Jamaica, Saint Kitts and Nevis, Saint Vincent and the Grenadines, and Trinidad and Tobago among others. CARICOM is dedicated to promoting economic integration and cooperation among its members, ensuring that the benefits of integration are equitably shared, and coordinating foreign policy. The CARICOM treaty allows, inter alia, free movement of member state citizens within the community, and the right to establish an economic enterprise in the community by a citizen of a member state.

The Resort – Grenada Lifestyle Cosmetic Surgery Clinic, Hotel, and SPA

The Company is planning to construct a premier healthcare Resort, called the “Grenada Lifestyle Clinic” and qualify it for the Grenada CBI program. The Resort is designed to cater for local and international patients seeking elective cosmetic surgery, in a relaxed, idyllic Caribbean Island environment.

See below for the site layout of the Resort.

The Resort will consist of a 26-bed Clinic with 3 fully equipped operating theatres, a 32-bed hotel for surgery after-care, 14 luxury villas with private swimming pools for VIP guests, and an executive spa. The health Resort will further include an eye hospital and a dental clinic. Attached below are the layouts and architectural drawings of some buildings inside the Resort.

Main Clinic

Villa 1

Restaurant

Construction Plan

Implementation for the Development of the Resort has officially started, and, at the time of this Memorandum, the Property Company is in the process of acquiring land for the Resort as part of the pre- construction preparation. The Property Company has secured an offer which requires a deposit with the seller of a property known as “The Glade” located at Point Saline, St. George measuring approximately 8.75 acres at a purchase price of \$5,000,000.

Construction will commence in 2025 and is expected to be finished within 20 Months. Total construction costs are projected to be approximately \$94,000,000.00, including 5% contingencies and 15% VAT. Construction schedule is attached below for reference.

Development and Construction Schedule

Citizenship by Investment Program

Grenada’s Citizenship by Investment Program allows individuals and their families to obtain citizenship or permanent residence. Applicants must apply through licensed agents and may not make submissions to the Government on their own behalf. The CBI program was authorized by the Grenada Act No. 15 of 2013, known as the “Grenada Citizenship by Investment Act, 2013,” in order to “enable persons to acquire permanent residence and citizenship of Grenada by registration following investment in Grenada.” Applicants may only make two types of investments to obtain citizenship or permanent residence:

1. They must make “a payment into the National Transformation Fund;” or
2. They must make “a payment towards an approved project in Grenada”¹

The Company intends to qualify the Resort as an approved project under the Grenada CBI program’s real estate option, under which eligible shareholders of the Company with investments of at least \$220,000 may seek to obtain Grenadian citizenship, subject to other requirements, government fee of \$50,000, government approval, and five (5)-year holding period. The Company, as the property developer, is required to contribute to at least 20 % of the total development cost of the project, excluding procurement of land, before the project can be accepted into the CBI program. An investor who also participates in the CBI program is required to hold his/her investment for five (5) years.

Grenada allows individuals to hold dual citizenship, and citizenship may be extended to family members, such as a spouse, dependent children, and dependent parents. Children and young adults may obtain preferred access, and in some cases grants, to top schools and universities.

Grenada has no foreign income, wealth, gift, inheritance, or capital gains tax. There is no restriction on the repatriation of profits and imported capital. Generous incentive packages exist including corporate tax incentives, full exemption from import duties, tax relief benefits, and export allowance. Grenada’s currency, the East Caribbean dollar (XCD), is pegged to the United States dollar

(USD). Lastly, there is duty-free trading in the Caribbean.

Grenadian citizens can travel visa free or visa on arrival to more than 140 countries. These include Commonwealth countries, the United Kingdom and all other members of the European Union, and important business hubs such as Singapore and Hong Kong. Grenada is one of very few nations, eleven to be precise, whose citizens can travel to the People's Republic of China without first obtaining a visa.²

¹ Further information on the Grenada CBI program and the list of approved real estate projects can be found at the website of the government of Grenada <https://www.cbi.gov.gd/index.php>.

² Full list of nations to which Grenadian citizens may travel visa-free is provided at and full benefits of a Grenadian citizenship can be found at <https://www.cbi.gov.gd/index.php/routes-to-citizenship/benefits>.

NATRA Coin Platform

NatraCoin (Pty) Ltd., a fintech company incorporated on Oct 25, 2019, was founded by one of the Directors of the Company, Mr. Gavin Stassen. NatraCoin (Pty) Ltd. is dedicated to establishing a blockchain payment platform to transfer the investment funds from the investors to the Company and issue CIH tokens to the investors in return in a safe, secure, and legal manner. NatraCoin (Pty) Ltd. has secured and licensed the requisite technology and intellectual properties rights from the prominent DigiShares platform in Denmark.

NatraCoin (Pty) Ltd. will be serving as the Transfer Agent of this Offering and providing services, including, but not limited to, investor registration, KYC/AML compliance check, token purchase, trade and settlement, processing of electronic document and digital signatures.

Benefits to Investors

CIH Tokens provides prospective investors with an opportunity to be a partial owner the Resort. With an investment as little as \$4,000.00, Token holders will be entitled to the profitability of the Resort. Investors in this Offering will become Shareholders of Class B Non- Voting Shares of the Company and can expect to receive quarterly profit distributions from the Company, which is forecasted to be five- 8 percent (5- 8%) annually. Should all Eight Million (8,000,000) Shares offered through this Offering be successfully sold and subscribed for, the Company shall own 20% of the Property Company.

Eligible investors can receive plastic surgery at cost at the Resort.

USE OF PROCEEDS

All or substantially all of the proceeds received by the Company from the issuance of Tokens shall be invested in the Property Company. The Property Company shall use the invested proceeds for the purpose of procuring land and developing the Resort, consisting of a lifestyle cosmetic surgery clinic, a hotel for surgery after-care, luxury villas, and an executive spa, in St. George, Grenada.

The Property Company has contractually secured the acquisition of a property known as “The Glade” located at Point Saline, St. George measuring approximately 8.75 acres at the purchase price of \$6,000,000.00.

Total development costs of the Resort are estimated to be \$94,000,000.00, mainly consisting of construction costs including a 5% contingency and 15% VAT. \$20,000,000.00 is earmarked for equipment. 20% of the total development costs, shall be invested by the Property Company, the property developer, in order to qualify the Resort as an approved real estate project under the CBI Program.

With a reserve of \$3,000,000.00 million for miscellaneous fees and expenses, the Property Company is expected to invest approximately \$17,000,000.00 in developing the Resort.

The Property Company may retain such amounts as it considers appropriate to maintain a liquid portfolio of cash, including deposits and government securities, for the purposes of paying its anticipated expenses and to meet any other cash needs.

MANAGEMENT

Gavin Stassen- CEO
www.linkedin.com/in/gavin-stassen

CEO – CARIBBEAN INVESTMENT HOLDINGS LLC., and Grenada Lifestyle Clinic Ltd.

Founder of the Lifestyle Plastic Surgery Clinic, Hotel & Spa Concept.

A Private Hospital Developer, Owner Operator and Consultant with a career spanning over 35 years. Expertise in the development, and management of numerous Hospitals and Day Clinics in South Africa with former partner Dr Jack Shevel. These developments culminated in the JSE Listing of the NetCare Hospital Group 29 Years ago. Today, NetCare has a market cap exceeding 22 Billion ZAR

www.netcare.co.za

Expertise in Hospital design having designed his own Hospitals and advised on more than 100 other facility designs during his career.

Hannes Lotz- Director

Construction and Project Management Executive, holding an array of qualifications such as **Master of Business Administration** from University of South Africa, **Bachelor of Engineering (Mechanical) degree** from University of Pretoria, South Africa, **Project Management Professional (PMP)** from Project Management Institute (PMI) and **Professional Engineer (PrEng) certification** from Engineering Council of South Africa.

Possess over 38 years of overall experience, including 7 years' international experience in Tete, Mozambique; Abu Dhabi, UAE and St George's, Extensive experience in the Caribbean managing the execution of mega projects with well-known reputable establishments.

Lived in Grenada for almost 3 years which makes him well suited to Manage the project.

CONFLICTS OF INTEREST

The Company is subject to various actual and potential conflicts of interest arising out of its relationship with Senior Management, the Directors, and its affiliates. With respect to the conflicts of interest described herein, Senior Management, the Directors, and its affiliates will endeavor in good faith to fairly balance the Company's interest with the interest of the Senior Management, the Directors, and its affiliates in making any determinations or decisions, but no assurance can be given that in such resolution that the Company's interests will be paramount. These conflicts include, but are not limited to, the items listed below:

- The Senior Management, the Directors, and its affiliates may form additional investment entities in the future, whether public or private, which may have the same or similar investment objectives and policies and be involved in the same geographic areas as the Company, and Senior Management, the Directors, and its affiliates may be engaged in sponsoring one or more of such entities at approximately the same time as the Company is offering the Tokens.
- The Senior Management, Directors and other employees of the Company must allocate their time between advising the Company and managing other real estate projects and business activities in which they may be involved.
- The Senior Management, Directors, and other officers of the Company will only devote so much time to the affairs of the Company as is reasonably required in their judgment. They also serve or may serve as officers or employees of other companies affiliated or unaffiliated with the Company. If and when there are turbulent conditions in the real estate markets or distress in the credit markets or other times when the Company needs their focused support and assistance, the attention of the Directors may also be required by other companies.
- The compensation payable by the Company to the Directors and officers may not be on terms that would result from arm's-length negotiations between unaffiliated parties, and the Management Fee is payable to the Manager, regardless of the profitability of the Company, the services provided to the Company or whether the Company makes distributions to Shareholders.

TRANSFER RESTRICTIONS

The Tokens offered here have not been registered under the Securities Act, in reliance upon the exemptions provided by the Securities Act and Regulation D, nor have the Tokens been registered under the securities laws of any state in which they will be offered in reliance upon applicable exemptions in such states. Therefore, the Tokens cannot be reoffered or resold unless they are subsequently registered under the Securities Act and any other applicable state securities laws or an exemption from registration is available under the Securities Act or such other laws. Pursuant to the terms of the Purchase Agreement, Investors shall agree to pledge, transfer, convey, or otherwise dispose of their interests only in a transaction that is the subject of (i) an effective registration under the Securities Act and any applicable state securities laws or (ii) an exemption such that the registration of such transaction is not required. Accordingly, purchasers of Tokens must be willing to bear the economic risk of investment in the Tokens.

The Tokens cannot be sold, pledged, or otherwise transferred, and the Company shall not recognize and shall issue stop-transfer instructions to its Transfer Agent with respect to any such transfer and will not recognize such transfer, except upon the conditions specified in the Purchase Agreement, the Organizational Documents and in compliance with U.S. State and federal securities and any other applicable laws. Additionally, Tokens may not be transferred within the first three hundred sixty-six (366) days of purchase and only in compliance with applicable laws and the Organizational Documents. A transferring Investor will cause any proposed purchaser, pledgee, or transferee of the Tokens held by such Investor to agree to take and hold such Tokens subject to the provisions and upon the conditions specified in the Purchase Agreement, and the Organizational Documents.

PLEASE NOTE THAT NO ACTION HAS BEEN TAKEN TO PERMIT THE OFFER, SALE, POSSESSION OR DISTRIBUTION OF THE TOKENS OR ANY RELATED DOCUMENTS IN ANY JURISDICTION WHERE ACTION FOR THAT PURPOSE IS REQUIRED. INVESTORS ARE REQUIRED TO INFORM THEMSELVES ABOUT, AND TO OBSERVE ANY RESTRICTIONS RELATING TO, THE TOKENS AND ANY RELATED DOCUMENTS IN THEIR RESPECTIVE JURISDICTIONS.

RISK FACTORS

The Tokens being offered are speculative in nature, involve a high degree of risk and should be purchased only by persons who can afford to lose their entire investment. There can be no assurance that the Company's business plan will be achieved or that a secondary market would ever develop for the Tokens, whether via blockchain-mediated trading platforms (expanded upon below), via third party registered broker-dealers or otherwise and, as a result, this investment may be highly illiquid. The risks set out below are not the only risks the Company and Investors face. Additional risks and uncertainties not presently known to us or not presently deemed material by us might

also impair the Company's operations and performance or the value of the Tokens. If any of these risks actually occurs, the value of the Tokens may be materially adversely affected.

These Risk Factors and the other information contained in this Memorandum are not legal, financial or tax advice and prospective Investors should obtain their own advisers prior to making an investment in the Interests. The following considerations are among those that should be carefully evaluated before making an investment in the Tokens.

Risks Related to Our Structure and Operations

We are a recently incorporated company with no operating history and no revenues, and you have no basis on which to evaluate our ability to achieve our business objective.

We are a recently formed company, incorporated under the laws of Grenada with no operating results, and we will not commence operations until obtaining funding through this offering. Because we lack an operating history, you have no basis upon which to evaluate our ability to achieve our business objective of completing our initial business combination with one or more target businesses. We have no plans, arrangements or understandings with any prospective target business concerning a business combination and may be unable to complete our initial business combination. If we fail to complete our initial business combination, we will never generate any operating revenues.

Past performance by our management team or their respective affiliates may not be indicative of future performance of an investment in us.

Information regarding performance is presented for informational purposes only. Any past experience or performance of our management team and their respective affiliates is not a guarantee of either (i) our ability to successfully identify and execute a transaction or (ii) success with respect to any business combination that we may consummate. You should not rely on the historical record of our management team or their respective affiliates as indicative of the future performance of an investment in us or the returns we will, or are likely to, generate going forward. Our management has no experience in operating special purpose acquisition companies.

Exchange rate fluctuations and currency policies may cause a target business' ability to succeed in the international markets to be diminished.

Revenues and income will likely be received in local or non-US currency, and the dollar equivalent of our net assets and distributions, if any, could be adversely affected by reductions in the value of the local currency. Any change in the relative value of the local currency to other currencies could negatively impact the attractiveness of the Project to out of country visitors, who are likely to be a significant portion of the visitors to the Project.

Our executive officers and directors will allocate their time to other businesses thereby causing conflicts of interest in their determination as to how much time to devote to our affairs. This conflict of interest could have a negative impact on our ability to complete our initial business combination.

Our executive officers and directors are not required to, and will not, commit their full time to our affairs, which may result in a conflict of interest in allocating their time between our operations and our search for a business combination and their other businesses. We do not intend to have any fulltime employees prior to the completion of our initial business combination. Each of our executive officers is engaged in several other business endeavors for which he may be entitled to substantial compensation, and our executive officers are not obligated to contribute any specific number of hours per week to our affairs. Our independent directors also serve

Changes in laws or regulations, or a failure to comply with any laws and regulations, may adversely affect our business, including our ability to negotiate and complete our initial business combination, and results of operations.

We are subject to laws and regulations enacted by national, regional and local governments, including, but not limited to, Grenada and the United States. In particular, we will be required to comply with certain SEC and other legal requirements. Compliance with, and monitoring of, applicable laws and regulations may be difficult, time consuming and costly. Those laws and regulations and their interpretation and application may also change from time to time and those changes could have a material adverse effect on our business, investments and results of operations. In addition, a failure to comply with applicable laws or regulations, as interpreted and applied, could have a material adverse effect on our business, including our ability to negotiate and complete our initial business combination, and results of operations.

Claims in the Event of Bankruptcy or Default of Secured Debt could produce significant adverse effects for Token-holders.

In the event of bankruptcy, liquidation or reorganization, the right of Investors to participate in assets will be subject to prior claims of creditors of the Company. If the Company defaults on any loan secured by the Resort, there could be a foreclosure on the asset. In a foreclosure sale, there is no guarantee the highest price could be obtained, and future business plans and opportunities may be curtailed or eliminated entirely.

If the Company is required to register under the U.S. Securities Exchange Act of 1934, it would result in significant expense and reporting requirements that would place a burden on the Voting Shareholders and the Company and may divert management's attention from the business or cause the Company to be unprofitable or suffer liquidity problems.

The Securities Exchange Act of 1934 requires issuers with more than \$10 million in total assets to register its equity securities under the Exchange Act if its securities are held of record by more than 2,000 persons or 500 persons who are not "accredited investors". There will be more than 2,000 Tokens, which would make it more likely that there accidentally would be greater than 2,000 beneficial owners of or 500 non- "accredited investors" of equity securities. If the Company is required to register under the Exchange Act, it would result in significant expense and reporting requirements that would place a burden on the Company's management and may divert attention from management of the Project and the Company's core business. If the Company were required to register under the Exchange Act, it could entail increased legal and other costs and liability for the Company.

Additionally, the regulatory risks described in this Memorandum take into consideration U.S. law only. It is anticipated that the Tokens will also be sold or resold outside the United States, which could subject the Company or the Tokens to non-U.S. legal requirements, which could be significant. Non-U.S. regulation could lead to the same types of changes and outcomes described above with respect to U.S. regulation, and any of these outcomes would negatively affect the value of the Tokens and/or cause unforeseen issues for the Company.

The Company is not subject to Sarbanes-Oxley regulations and may lack the financial controls and procedures of public companies.

The Company may not have the internal control infrastructure that would meet the standards of a public company, including the requirements of the Sarbanes Oxley Act of 2002. As a privately held (nonpublic) Company, the Company is currently not subject to the Sarbanes Oxley Act of 2002, and its financial and disclosure controls and procedures reflect its status as a development stage, non-public company. There can be no guarantee that there are no significant deficiencies or material weaknesses in the quality of the Company's financial and disclosure controls and procedures. If it were necessary to implement such financial and disclosure controls and procedures, the cost to the Company of such compliance could be substantial and could have a material adverse effect on the Company's results of operations.

The Tokens will not be registered, and no one has passed upon either the adequacy of the disclosure contained herein or the fairness of the terms of the offering.

No governmental agency has reviewed this offering and no state or federal agency has passed upon either the adequacy of the disclosure contained herein or the fairness of the terms of any offering. The exemptions relied upon for such offerings are significantly dependent upon the accuracy of the representations of the investors to be made to the Company in connection with the offering. In the event that any such representations prove to be untrue, the registration exemptions relied upon by the Company in selling the securities might not be available and substantial liability to the Company would result under applicable securities laws for rescission or damages.

Furthermore, the securities being offered have not been registered under the Securities Act, in reliance, among other exemptions, on the exemptive provisions of article 4(2) of the Securities Act and Regulation D under the Securities Act. Similar reliance has been placed on apparently available exemptions from securities registration or qualification requirements under applicable state securities laws. No assurance can be given that any offering currently qualifies or will continue to qualify under one or more of such exemptive provisions due to, among other things, the adequacy of disclosure and the manner of distribution, the existence of similar offerings in the past or in the future, or a change of any securities law or regulation that has retroactive effect. If, and to the extent that, claims or suits for rescission are brought and successfully concluded for failure to register any offering or other offerings or for acts or omissions constituting offenses under the Securities Act, the Securities Exchange Act of 1934, or applicable state securities laws, the Company could be materially adversely affected, jeopardizing the Company's ability to operate successfully. Furthermore, the human and capital resources of the Company could be adversely affected by the need to defend actions under these laws, even if the Company is ultimately successful in its defense.

Compliance with the criteria for securing exemptions under federal securities laws and the securities laws of the various states is extremely complex, especially in respect of those exemptions affording flexibility and the elimination of trading restrictions in respect of securities received in exempt transactions and subsequently disposed of without registration under the Securities Act or state securities laws.

There is currently no trading market for the Token and an active market in which investors can resell their Tokens may not develop. As a result, Investors may need to hold their Tokens indefinitely.

There is currently no trading market for the Token in the U.S. or elsewhere, and an active market may not develop or be sustained. If an active public or private trading market for our securities does not develop or is not sustained, it may be difficult or impossible for you to resell your Tokens at any price. Moreover, limited liquidity could negatively impact the value of the Tokens even if a market develops in a limited capacity. Although the Management currently plan to seek registration of the Token with the Securities & Exchange Commission at some point in the future, such registration may never become effective. Even if the Tokens are successfully registered, the Tokens may never be listed on a public securities exchange, and the Company may fail to engage broker-dealers or others to make a market in the

Tokens. Even if a public or private market does develop through an exchange listing or otherwise, the market price of the Tokens could decline below the amount you paid for your Tokens.

It is possible that the Token may become tradeable through a blockchain-intermediated or “decentralized” peer-to-peer exchange. However, such exchanges are untested and, as of the time of this offering, have not been approved or the subject of a letter of no action from the Securities & Exchange Commission for use in trading tokenized securities. These exchanges are also subject to myriad technical and legal risks.

U.S. purchaser of the Tokens will be subject to additional restrictions, and will not be permitted to trade the Token on offshore exchanges. U.S. Investors have a holding period of one year and one day before they will be permitted to sell their Tokens. This means that, even if an offshore market were to develop for the Tokens, U.S. Investors will not be able to access that market to sell their Tokens. Consequently, U.S. Investors face additional liquidity risk from an investment in the Tokens which may negatively impact the value of the Tokens or cause a divergence in price of Tokens sold to U.S. investors and non-U.S. investors.

If a market ever develops for the Tokens, the market price and trading volume of Tokens may be volatile.

If a market develops for the Tokens, the market price of the Tokens could fluctuate significantly for many reasons, including reasons unrelated to our performance, such as liquidity, reports by industry analysts or investor perceptions, as well as general economic and market conditions. In addition, fluctuations in distributions made to Token holders could impact the market price of the Tokens.

Distributions to Holders may fluctuate in the future due to a variety of factors that could negatively affect revenues or expenses in any particular reporting period, including vulnerability of our business to a general economic downturn; changes in the laws that affect our operations; competition; compensation related expenses; application of accounting standards; seasonality; and our ability to obtain and maintain all necessary government certifications or licenses to conduct our business.

The Company does not have a significant operating history and as a result, there is a limited amount of information about the Company on which to base an investment decision.

The Company was recently formed for the purposes of holding, through the Operating Company, the Resort, and has not generated any revenues and has no operating history upon which prospective investors may evaluate their performance. No guarantee can be given that the Company will succeed in its intended business. An investment in the Token is a highly undiversified investment, and the Company does not anticipate meaningful diversification of its assets. It is not anticipated that the Company would own assets other than the Resort, plus potential cash reserves for operation of the Company not otherwise distributed to Token Holders.

The loss of key personnel or an inability to attract, retain and motivate qualified personnel or secure reliable third-party service providers may impair our ability to expand the Company’s business.

The Company’s success is substantially dependent upon the continued service and performance of its senior management team and key service providers. Our employees, including our senior management team, are at-will employees, and therefore may terminate employment with us at any time with no advance notice. The replacement of any Shareholders of our senior management team or other key personnel likely would involve significant time and costs and may significantly delay or prevent the achievement of our business objectives. Additionally, if the Company is unable to secure reliable third-party service providers that may be reasonably necessary or helpful for the Resort, the value of the Project and Tokens could be negatively impacted.

The Company’s business, operating results and growth rates may be disproportionately adversely affected unfavorable economic and market conditions.

Although all businesses may, to some degree, be affected by adversely affected by global or local economic changes, it is possible the market for resort-style vacations may be disproportionately affected. If the conditions in the U.S. and global economies deteriorate, become uncertain or volatile, our business, operating results and financial condition may be materially adversely affected.

A privacy breach could damage our reputation and our relationship with our customers, expose us to litigation risk and adversely affect our business.

As part of our normal course of business, we collect, process and retain sensitive and confidential customer information. Despite security measures we have in place, our facilities and systems may be vulnerable to security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors, or other similar events. Any security breach involving the misappropriation, loss or other unauthorized disclosure of confidential information could severely damage our reputation and our relationships with our customers, expose the Company to risks of litigation and liability and adversely affect our business.

Risk Related to the Project

The Project has not yet been completed and overage costs could force the company to take potentially adverse actions.

The Project has not yet been completed and the Company has generated no profits. Ecological, construction, labor, or regulatory problems could cause the project to have further delays. If the Company were to have cost overruns, completing the Project could require additional capital in the form of debt or equity. Any additional equity could result in dilution for Investors. Any debt could constrain the company's ability to operate or result in a lien on the assets of the Company or the Operating Company, or may be obtained on terms that are particularly costly.

The Project is located in Grenada, and we are dependent on the Grenada economy and government and are susceptible to adverse local regulations and natural disasters affecting Grenada.

The Project is located in Grenada, which exposes the Company to greater economic risks than if it held a geographically dispersed portfolio. Further, the Project is exposed to risks associated with Grenada that may not otherwise be applicable. The Company is susceptible to adverse developments in the Grenada economic and regulatory environment (such as business layoffs or downsizing, industry slowdowns, relocations of businesses, increases in real estate and other taxes, costs of complying with governmental regulations or increased regulation), as well as to natural disasters that occur in our markets (such as earthquakes and other events). Any adverse developments in the economy or real estate market in Grenada, or any decrease in demand for travel resulting from the Grenada regulatory or business environment, could adversely impact the Company's financial condition, results of operations, cash flow and the per share trading price of the Tokens. Additionally, Grenada has a hurricane season which may present a natural disaster risk.

The Project is not currently insured and potential future losses, including from adverse weather conditions, natural disasters and title claims, may not be covered by insurance.

The Project is currently uninsured and subject to substantial loss in event of certain ordinarily insured outcomes, such as destruction by weather or natural disaster. Upon completion of the Project, the Company intends to carry commercial property (including earthquake), and liability coverage on the Project. The Company will select policy specifications and insured limits that it believes to be appropriate and adequate given the relative risk of loss, the cost of the coverage and industry practice. However, the Company will not carry insurance for losses such as loss from riots or war if such coverage is not available or is not available at commercially reasonable rates or if Senior Management deems it not a significant risk.

Some of our prospective policies, like those covering losses due to terrorism or earthquakes (if acquired at all), may be insured subject to limitations involving large deductibles or co-payments and policy limits that may not be sufficient to cover losses, which could affect certain of our properties that are located in areas particularly susceptible to natural disasters. While we may carry earthquake insurance on our properties, the amount of our earthquake insurance coverage may not be sufficient to fully cover losses from earthquakes. In addition, we may discontinue earthquake, terrorism or other insurance on the Project in the future if the cost of premiums for any such policies exceeds, in our judgment, the value of the coverage discounted for the risk of loss. As a result, we may be required to incur significant costs in the event of adverse weather conditions and natural disasters.

In the event that we experience a substantial or comprehensive loss of the Project, we may not be able to rebuild such property to its existing specifications. Further reconstruction or improvement of such a property would likely require significant upgrades to meet zoning and building code requirements.

We could incur significant costs related to government regulation and litigation over environmental matters.

Under various laws and regulations relating to the environment, as a current or former owner or operator of real property, we may be liable for costs and damages resulting from the presence or discharge of hazardous or toxic substances, waste or petroleum products at, on, in, under or migrating from such property, including costs to investigate, clean up such contamination and liability for harm to natural resources. Such laws often impose liability without regard to whether the owner or operator knew of, or was responsible for, the presence of such contamination, and the liability may be joint and several. These liabilities could be substantial and the cost of any required remediation, removal, fines or other costs could exceed the value of the property and/or our aggregate assets. In addition, the presence of contamination or the failure to remediate contamination at our properties may expose us to third-party liability for costs of remediation and/or personal or property damage or materially adversely affect our ability to sell, lease or develop our properties or to borrow using the properties as collateral. In addition, environmental laws may create liens on contaminated sites in favor of the government for damages and costs it incurs to address such contamination. Moreover, if contamination is discovered on our properties, environmental laws may impose restrictions on the manner in which property may be used or businesses may be operated, and these restrictions may require substantial expenditures. Some of our properties have been or may be impacted by contamination arising from current or prior uses of the property, or adjacent properties, for commercial or industrial purposes. Such contamination may arise from spills of petroleum or hazardous substances or releases from tanks used to store such materials. As a result, we could potentially incur material liability for these issues, which could adversely impact our financial condition, results of operations, cash flow and the per share trading price of our common stock.

Environmental laws also govern the presence, maintenance and removal of asbestos-containing building materials, or ACBM, and may impose fines and penalties for failure to comply with these requirements or expose us to third-party liability (e.g., liability for personal injury associated with exposure to asbestos). Such laws require that owners or operators of buildings containing ACBM (and employers in such buildings) properly manage and maintain the asbestos, adequately notify or train those who may come into contact with asbestos, and undertake special precautions, including removal or other abatement, if asbestos would be disturbed during renovation or demolition of a building. In addition, the Project is subject to various environmental and health and safety requirements, such as state and local fire requirements. Moreover, the Project, in its operation, may routinely handle and use hazardous or regulated substances and wastes as part of its operations, which are subject to regulation. In addition, changes in laws could increase the potential liability for noncompliance. This may result in significant unanticipated expenditures or may otherwise materially and adversely affect our operations, or those of our tenants, which could in turn have an adverse effect on us. We cannot assure you that costs or liabilities incurred as a result of environmental issues will not affect our ability to make distributions to you or that such costs or other remedial measures will not have an adverse effect on our financial condition, results of operations, cash flow and per share trading price of our common stock. If we do incur material environmental liabilities in the future, we may face significant remediation costs.

The Project will operate in a highly competitive industry and our revenues and profits could be harmed if we are unable to compete effectively; moreover, demographic or generational travel trends may render the large-scale resort less popular.

While the Company believes that there will be significant customer demand for its products/services, there is no assurance that there will be broad market acceptance of the Company's offerings. There also may not be broad market acceptance of the Company's offerings if its competitors offer products/services which are preferred by prospective customers. In such event, there may be a material adverse effect on the Company's results of operations and financial condition, and the Company may not be able to achieve its goals. Attracting visitors from the global community will be key to the Project, and the Company's, success. However, the growth of globalization and tourism as an industry has created significant competition from vacation locales across the world. Additionally, "millennial" and "generation Z" travelers may have different tastes and preferences in their mode and style of travel which could harm the long-term prospects of the Project.

Increased labor costs, labor shortages or labor disruptions could increase completion costs or reduce long-term profitability.

Because labor costs are and will continue to be a major component of our operating expenses, higher labor costs could reduce our profitability or cause completion of the Project to be more costly. Higher labor costs could result from, among other things, labor shortages that require us to raise labor rates in order to attract employees, and increases in minimum wage rates. Higher employee health insurance costs could also adversely affect our profitability. Additionally, increased labor costs, labor shortages or labor disruptions by employees of our third-party contractors and subcontractors could disrupt our operations, increase our costs and affect our profitability.

Our ability to implement our proposed business strategy and the success of the Project may be materially and adversely affected by many known and unknown factors.

The Company and the Project's success will depend on numerous factors that could be affected by an exponential number of factors including, among other things the ability to: hire high quality management, secure contracts with third parties, secure short-term financing, if necessary, operate in Grenada. These assumptions, which are critical to our prospects for success, are subject to significant economic, competitive, regulatory and operational uncertainties, contingencies and risks, many of which are beyond our control. These uncertainties are particularly heightened by the fact that we have significantly limited historical financial results or data on which financial projections might be based.

The cost of certain materials and utilities is higher than in other countries.

The cost of certain materials and utilities, such as electricity, are higher in Belize. Any price "shocks" to those materials or utilities could distort costs to complete, result in cost overruns and render projections unreliable

We face risks in connection with our operations that may differ from those in the United States.

The Project is located in Grenada and our operations are heavily dependent upon products made, purchased and sold locally in Grenada and internationally. In addition, our operations are a significant factor in the local economy of Grenada, increasing our visibility and susceptibility to legal or regulatory changes. These activities are subject to risks that are inherent in operating in foreign countries, including the following:

- Foreign countries could change laws and regulations or impose currency restrictions and other restraints;
- In some countries, there is a risk that the government may expropriate assets; • Some countries impose burdensome tariffs and quotas;
- Political changes and economic crises may lead to changes in the business environment in which we operate;
- International conflict could significantly impact our business, financial condition and result of operations; or
- Economic downturns, political instability and war or civil disturbances may disrupt production and logistics or limit sales to different markets or could disproportionately impact Grenada.

Risks Related to this Offering

The Tokens issued by the Company are risky investments.

The Tokens issued are evidenced in tokenized form and carry additional risks compared to other common investments by virtue of the entitlements being digitally evidenced by a blockchain record. See also the section “Risks Related to the Industry & Digitalization”. Expected returns to Token holders will depend on Company’s ability to successfully develop its business, as well as the continued adoption of blockchain technology, digital assets, and market conditions which are largely outside of the Company’s control.

An investment in an Offering constitutes only an investment in the Company’s Class B nonvoting stock and not in the Project directly or the Operating Company.

An Investor in the Tokens will acquire a limited ownership interest in the Company and not, for the avoidance of doubt, in the Project or Operating Company directly. This investment results in limited voting rights in the Company and no voting rights in the Operating Company. Investors will have extremely limited voting rights, limited only to certain matters, primarily relating to amendments to the Organizational Documents that would directly adversely change the rights of the Token Holders. The Voting Shareholders, and Senior Management in particular, thus retain significant control over the management of the Company and virtually all control over each of the Operating Company and the Property Management Company.

Senior Management holds all of the Management Shares of the Company, they can exert control over the Company’s business and affairs and have actual or potential interests that may depart from those of subscribers in the offering.

The Senior Management own or control all of the Management Shares and a significant percentage of the overall equity of the Company. As a result, in addition to their board seats and offices, such persons will have control over all corporate actions requiring stockholder approval, except the rights of the Tokens, irrespective of how the Company’s other stockholders, including purchasers in the offering, may vote, including the following actions:

- to elect or defeat the election of the Company’s directors;
- to amend or prevent amendment of the Company’s Organizational Documents;
- to effect or prevent a merger, sale of assets or other corporate transaction; and
- to control the outcome of any other matter submitted to the Company’s stockholders for vote.

Such persons’ ownership may discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company, which in turn could reduce the Company’s stock price or prevent the Company’s stockholders from realizing a premium over the Company’s stock price.

Furthermore, members of Senior Management currently and may in the future possess various additional interests in the business of the Company, such as (but not limited to) their holdings of 25 of the Company’s long-term leases. The interests of Senior Management may consequently differ from the interests of the Company’s other stockholders, notably Token holders.

The Tokens are not freely transferable at the time of sale and therefore have limited liquidity.

The Tokens are subject to and programmed for restrictions on transfer for three hundred sixty- six (366) days. All transfers may only be conducted in accordance with U.S. and non-U.S. law, including investment laws relating to secondary sales of securities. Non-U.S. Investors must also comply with transfer and hedging activities, as set forth in the Purchase Agreement. Restrictions on transfer may reduce the liquidity of an investment by reducing the number of potential transferees. All transfers must be conducted in accordance with non-US and US state and federal securities laws. Even if a sale is permitted under applicable U.S. and non-U.S. law, there is no ready public market for the Tokens and that there is no guarantee that a market for their resale will ever exist. The Company has no obligation to find a purchaser for the Tokens if an Investor desires to sell. Any transfer would need to be conducted in compliance with applicable law and the Company’s Organizational Documents. Accordingly, it may be difficult to sell the Tokens for cash or an Investor may have to sell the Tokens at a substantial discount. Tokens may only be transferred via the Smart Contracts and accordingly, purchaser or pledgee interest may be affected.

The Company does not currently have audited financial statements nor is it required to provide investors with any annual audited financial statements or quarterly unaudited financial statements.

The Company has not audited its projections, financial statements or balance sheets by outside auditors. In addition, the Company is not required to provide investors in the offering with financial information concerning the Company to which the investors may use in analyzing an investment in the Company. Therefore, your decision to make an investment in the Company must be based upon the information provided to the investors in its private placement documents without financial statement information and therefore, the limited information provided herewith with which investors will make an investment decision may not completely or accurately represent the financial condition of the company. Furthermore, as a non-reporting SEC company, the Company is not required to provide you with annual audited financial statements or quarterly unaudited financial statements.

The Company's financial projections make assumptions regarding capacity and other variables, which may not be accurate.

The Development Projections represent Senior Management's best estimations of future performance. However, assumptions that underlie these future projections may be inaccurate.

The Company may be unable to attract sufficient interest in the Tokens, which could strain the Company's ability to repay or service debt or complete the Project.

The Company may be unable to attract enough Investors to purchase the Tokens. If an Investor purchased Tokens prior to the closing of the Offering, but the Company is unable to attract a sufficient number of Investors to purchase the Tokens, the Offering may be terminated or extended. As a result, Investors may not receive a return on an investment in the Tokens or it may be delayed. Furthermore, if the Company is unable to raise enough capital through its sale of Tokens, it may suffer ramifications and liquidity problems under any future debt required to complete the Project. Although the existing debt is not currently secured, lawsuits could create liens on Operating Company property or cause penalties, increased interest rates or other fees or costs. Furthermore, if the Company is unable to raise sufficient funds, it will not be able to complete the Project or not complete the Project in a timely fashion, which could de

The Company's management have broad discretion in how the Company use the net proceeds of an offering.

The Company's management will have considerable discretion over the use of proceeds from their offering. You may not have the opportunity, as part of your investment decision, to assess whether the proceeds are being used appropriately. Investors will not have significant say in how proceeds are utilized after Closing.

The Purchase Agreement contains a waiver of jury trial and arbitration clause, which includes federal securities claims.

The Purchase Agreement contains a waiver of jury trial and arbitration clause that forecloses certain routes to legal remedies for Investors. The lack of availability of a jury trial may present a significant risk that Investors are unable to obtain relief for a claim or are unable to seek relief in their preferred method.

There are tax risks associated with an investment in the Tokens and the U.S. federal income tax consequences of an investment in the Tokens are uncertain.

You will be subject to complex and potentially adverse tax consequences as a result of your purchase of a Token. Investors are strongly encouraged to consult their own tax advisor regarding the U.S. federal, state, local and non-U.S. tax consequences of the purchase, ownership, and disposition of the Tokens (including any possible differing treatment of the Tokens).

The Company may end the Offering early at any time.

The Company may end the Offering early at any time. This means your failure to participate in the Offering in a timely manner may prevent you from being able to participate, and the Company may limit the amount of capital it can raise during the Offering by ending it early.

The Company may accept in-kind subscriptions.

The Company may accept subscriptions from prospective investors by way of deposits of cryptocurrencies. Such in-kind subscriptions will be subject to a thorough legal review, may be subject to additional non-refundable fees, could take an extended period of time to process, may decrease in value between the date that such in-kind subscription was transferred to the Company and the date of such investor's admission to the Company as a Shareholder, and may be rejected by the Company for any reason or no reason with no refund of the costs or depreciation experienced by the prospective investor. Any refund of in-kind contributions may be paid (i) in the same form of cryptocurrencies as they were received by the Company; and (ii) to the same wallet address or account from which such cryptocurrencies were received by the Company. The Company may, in the Board's sole discretion, refund an in-kind subscription, in whole or in part, by a prospective investor to a different wallet address, provided such wallet address has been designated in writing by such prospective investor and the Company provides such Member a written notice confirming the new wallet address. The Company may send one or more test transactions to the wallet address designated by a prospective investor prior to sending the full amount to be refunded, and the costs of such test transaction shall be deducted from the total amount to be refunded to such a prospective investor.

The Company is an unregistered investment vehicle.

Given the nature of the Company's proposed investments, the Company does not expect to be an "investment company" required to register as such under the Investment Company Act, and the Board, by reason of its management of the Company, is not an "investment adviser" required to register as such under the Investment Advisers Act of 1940. As a result, the Company will not be subject to the provisions of the Investment Company Act that apply to registered investment companies and investors in the Company will not have the

protections that may be deemed to be afforded to investors under those acts. These provisions, among other things, (1) place restrictions on certain investment practices, such as short sales and leverage, (2) require securities held in custody for the account of the investment company to be segregated from the securities of any other person and marked to clearly identify the securities as the property of the investment company, and (3) regulate the relationship between the investment company and its investment adviser and its affiliates. To maintain an exemption from the Investment Company Act, the Board may need to limit the types of investments the Company can make, limit the Offering to certain types of purchasers or restrict the transfer of Tokens to certain transferees.

Risks Related to Blockchain Technology, Digital Assets, and the Ethereum Network

Digital assets, such as the Tokens offered by the Company, are based upon novel and relatively untested technology.

Because of the nascency of the cryptocurrency, tokenized securities and related assets (“**Digital Assets**”) sector, there are not well-developed industry standards for security practices or IT infrastructure for cryptocurrency wallets and exchanges. New technological advances, such as quantum computing, could undermine the viability of blockchain technology. This creates substantial investment risks above and beyond those in traditional investment markets. This risk is heightened by the unclear and potentially changing regulation and foreign status of many of the token markets and their participants. Unlike registered commodity or security exchanges in the traditional financial sector, many of these exchanges and wallets lack legal protections for their users. Cryptocurrency wallets function as a substitute for depository institutions but are not banks. They are not covered by the FDIC or other consumer protection insurance scheme. Similarly, exchanges may not carry the same obligations to customers that a traditional financial institution has. This includes but is not limited to issues regarding privacy, security of assets, and liability for losses. The regulatory landscape and often offshore nature of cryptocurrency markets is unclear and may be subject to unexpected changes which creates additional systemic risks for market participants, compared to traditional financial markets. This lack of oversight, regulation, and government support may result in adverse impacts on the value of an investment in the Tokens.

The potential application of existing regulatory regimes governing blockchain technologies, cryptocurrencies, tokens, and token offerings such as the Tokens is not fully developed and so remains uncertain in many respects.

New regulations or policies may materially adversely affect the utility of the Tokens. Regulations with respect to digital securities such as the Tokens, cryptocurrencies (such as BTC or ETH that may be used by the Company to make distributions to our Token holders), financial intermediaries such as spot cryptocurrency exchanges, and blockchain networks (such as the Ethereum Network on which the Tokens is intended to be issued), currently is relatively undeveloped and is likely to rapidly evolve. Such regulation may vary and may conflict among international, federal, state, and local jurisdictions and the potential applications of existing regulations remain subject to significant uncertainty in many respects. In addition, various legislative and executive bodies in the United States and other countries may in the future adopt new laws, regulations, guidance, or other actions (including applying existing laws and regulations in ways that are adverse), which may severely impact the ability to access marketplaces or exchanges on which to trade the Tokens, and the structure, rights, value, and transferability of the Tokens. In addition, failure by us to comply with any laws, rules, and regulations, some of which may not exist yet or are subject to interpretation and may be subject to change, could result in a variety of adverse consequences, including civil penalties and fines.

The development and acceptance of blockchain networks, which are part of a new and rapidly changing industry, as well as blockchain-based assets such as BTC and ETH are subject to a variety of factors that are difficult to evaluate.

The slowing or stopping of the development or acceptance of blockchain networks and blockchain assets would have an adverse material effect on the successful development and adoption of the Tokens. The utilization and growth of the blockchain industry is subject to a high degree of uncertainty. The factors affecting the continuing utilization and further development of the cryptocurrency industry, as well as blockchain networks, include, without limitation:

- Worldwide growth, or a decline, in the adoption and use of BTC or ETH and other blockchain assets as well as the decreasing use of blockchain technology;
- Government and quasi-government regulation of BTC or ETH and other blockchain assets and their use, or restrictions on, or regulation of access to and operation of blockchain networks (such as the Ethereum Network) or similar systems, including in jurisdictions outside the United States;
- The maintenance and development of the open-source software protocol of the Ethereum Network;
- The availability and popularity of other forms or methods of buying and selling goods and services, or trading assets including new means of using sovereign currencies (such as the U.S. dollar) or existing networks; or
- General economic conditions and the regulatory environment relating to cryptocurrencies.

The slowing or stopping of the development, general acceptance, adoption, and usage of blockchain networks (such as the Ethereum Network) and blockchain assets may deter or delay the acceptance and adoption of the Tokens.

The prices of blockchain assets such as BTC and ETH have historically been subject to dramatic fluctuations and are highly volatile, and the market price of the Tokens may also be highly volatile.

Several factors may influence the market price of the Tokens, including, but not limited to:

- Global blockchain asset supply;
- Global blockchain asset demand, which can be influenced by the growth of retail merchants' and commercial businesses' acceptance of blockchain assets like cryptocurrencies as payment for goods and services, the security of online blockchain asset exchanges, and digital wallets that hold blockchain assets, the perception that the use and holding of blockchain assets is safe and secure, and the regulatory restrictions on their use;
- Investors' expectations with respect to the rate of inflation;
- Interest rates;
- Currency exchange rates, including the rates at which digital assets may be exchanged for fiat currencies;
- Fiat currency withdrawal and deposit policies of exchanges, such as an ATS or other exchange, on which the Tokens may be traded and liquidity on such exchanges;
- Interruptions in service from or failures of exchanges on which the Tokens may be traded;
- Investment and trading activities of large investors, including private and registered funds, that may directly or indirectly invest in the Tokens or other blockchain assets;
- Monetary policies of governments, trade restrictions, currency devaluations and revaluations;
- Regulatory measures, if any, that affect the use of blockchain assets such as the Tokens;
- The maintenance and development of the open-source software protocol of the Ethereum Network;
- Global or regional political, economic, or financial events and situations; or
- Expectations among blockchain assets participants that the value of the Tokens or other blockchain assets will soon change.

A decrease in the price of a single blockchain asset may cause volatility in the entire blockchain asset industry and may affect other blockchain assets including the Tokens.

The Tokens may be impacted by changes on the Ethereum Protocol.

Due to the evolving needs of Ethereum Protocol users, the functionality and operation of the relevant blockchain network may be subject to change. Such changes may interrupt service or otherwise impede the successful launch or maintenance of the Tokens. The Company may be unable to quickly adapt to changes made to the Ethereum blockchain network. As a result, the Tokens may have an unexpected and prolonged period of service disruption resulting in an adverse impact on the value of an investment in the Tokens.

The Tokens are intended to be issued as ERC-20 tokens on the Ethereum blockchain. Changes, such as upgrades to Ethereum's blockchain, may have unintended, adverse effects on all blockchains utilizing the ERC-20 tokens. Also, the Ethereum Network operates based on an open-source protocol maintained by contributors, and contributors are generally not compensated for maintaining and updating the Ethereum Network protocol. The lack of guaranteed financial incentive for contributors to maintain or develop the Ethereum Network and the lack of guaranteed resources to adequately address emerging issues with the Ethereum Network may reduce incentives to address the issues adequately or in a timely manner. This may adversely affect either the market value or the operational status of the Tokens. Additionally, the Company, in its sole discretion may determine to issue the Tokens on a blockchain other than Ethereum, which may adversely impact an investment in the Tokens.

Currently only a small number of SEC-registered ATSs with technological capabilities to permit the trading of securities tokens exist, such as the Tokens.

Because the Tokens are intended to be issued as ERC-20 tokens on the Ethereum blockchain, they currently cannot be traded using a conventional securities trading platform. However, because the Tokens are securities, they are not permitted to be traded on most spot cryptocurrency exchanges that are capable of handling blockchain assets (e.g., Coinbase), because most spot cryptocurrency exchanges are not registered with the SEC to offer trading securities.

A number of companies that provide services relating to cryptocurrency or blockchain tokens (like the Tokens described herein) have been unable to find banks or financial institutions that are willing to provide them with bank accounts and other services.

Similarly, a number of companies and individuals or businesses associated with cryptocurrencies and blockchain tokens may have had and may continue to have their existing bank accounts suspended or closed. The Company also may be unable to obtain or maintain these services, as may any cryptocurrency exchange that may be relied upon by the Company to convert contributions of cryptocurrency received from us into BTC, ETH, or other cryptocurrencies to be paid out to our Token holders.

Banks and other established financial institutions may refuse to process funds for cryptocurrency or blockchain transactions, process wire transfers to or from cryptocurrency exchanges, cryptocurrency-related companies, or service providers, or maintain accounts for persons or entities transacting in cryptocurrency. The Company's inability to obtain or maintain a bank account may impact the Company's ability to process distributions to our Token holders and otherwise impact the function and value of the Tokens.

Security breaches, computer malware and computer hacking attacks have been a prevalent concern since the launch of blockchain networks.

Any security breach caused by hacking, which involves efforts to gain unauthorized access to information or systems, or to cause intentional malfunctions or loss or corruption of data, software, hardware or other computer equipment, and inadvertent or intentional infection by computer viruses, could harm or damage the software behind the Tokens, which are intended to use the Ethereum blockchain, resulting in a loss of functionality, value, possession, or other damage to the holders of such the Tokens..

We collect and retain certain personal information provided by our Shareholders and tenants in the properties owned by the Company. While expect to implement a variety of security measures to protect the confidentiality of this information and periodically review and improve our security measures, we can provide no assurance that we will be able to prevent unauthorized access to this information. A cyber incident is considered to be any adverse event that threatens the confidentiality, integrity, or availability of our information resources. More specifically, a cyber incident is an intentional attack or an unintentional event that can include gaining unauthorized access to systems to disrupt operations, corrupt data, or steal confidential information. As our reliance on technology has increased, so have the risks that could directly result from the occurrence of a cyber incident including operational interruption, damage to our relationship with our tenants, and private data exposure, any of which could negatively impact our reputation and financial results.

The immutability of cryptocurrency network ledgers may mean stolen, lost, or incorrectly transferred digital assets may be irretrievable.

Generally, Tokens are controllable only by the possessor of a unique public key and private key relating to the local or online digital wallet in which the Tokens are held. While many blockchains require a public key relating to a digital wallet to be published when used in a spending transaction, private keys must be safeguarded and kept private in order to prevent a third party from accessing the tokens held in such wallet. To the extent a private key is lost, destroyed, or otherwise compromised and no backup of the private key is accessible, the Company and its Transfer Agent will be unable to access the Tokens held in the related digital wallet and the private key will not generally be capable of being restored. Any loss of private keys relating to digital wallets used to store the Tokens could adversely affect an investment in the Tokens.

Digital wallets are subject to significant technical risks.

Vulnerabilities or errors in the computer code operating digital wallets can, and have in the past, resulted in the permanent loss of Tokens held in those wallets. Vulnerabilities and exploits may permit bad actors to irreversibly transfer assets out of the wallet. Similarly, code errors and poorly constructed smart contracts underlying the operation of digital wallets have in the past resulted in the 'locking' of wallets, freezing assets in place permanently. This effectively destroys the value of the Tokens held in the wallet, and such errors may never be reversible, or the assets rendered irretrievable.

The storage of private keys is onerous and subject to unusual security risks.

Physical records of the private keys corresponding to Tokens not held in digital wallets or with a custodian must be kept in physically secured storage ("Cold Storage") by the Investor. Any loss or theft of such records and/or backup records would adversely affect an investment in the Tokens. In addition, the Company and its Transfer Agent may use multi-signature private keys to allow for lawful transactions to occur related to the Tokens where one private key is held by Investor and another key or keys are held by the Company or its Transfer Agent. As a result, Investor may not be able to freely transfer Tokens held by Investor without the approval of the Company or its Transfer Agent. If either Investor's private key or the Company or its Transfer Agent's keys are stolen, damaged, lost, or otherwise unusable, Investors may not be able to transfer the Tokens, resulting in a total loss of investment. The Company may use third-party software or hardware to store Investor's private key related to the multi-signature private key system. If such software or hardware's security is compromised, the Company may be unable access Investor's private key in relation to the multi signature private key system. In such event, Investor may not be able to transfer their Tokens, resulting in a total loss of investment.

Regulated financial institutions have a limited presence and involvement in Digital Asset markets and transactions.

The relative lack of involvement by regulated financial institutions introduces additional risks of loss due to lack of redundancy and human error. The Company's Transfer Agent may make mistakes in entering public addresses and send Tokens to the wrong wallet, without the opportunities for third-party clearance, review, or recovery that is available with traditional financial institutions. The lack of third-party clearance and immutability of transactions makes Token transfer transactions particularly lucrative targets for phishing, spoofing, and hacking attacks intended to substitute incorrect wallet addresses or otherwise intercept Token transfers. This lack of third-party clearance or verification also increases the likelihood of a loss of Tokens to human error. The risk of loss of Tokens to human error is particularly acute because of the immutable and irreversible nature of cryptocurrency networks.

The entry of an invalid destination address will typically “burn” the Token, permanently and irretrievably destroying the Token. This means that a simple missed keystroke can result in the permanent and irreversible loss of assets.

Because anyone with the appropriate key can access and use a Token, there are significant risks relating to compromised digital security and hacking. There may be existing backdoors, unknown exploits, or bugs in the code underlying the Company’s cryptocurrency wallets. The Company’s ability to adapt the security systems for the Company to emerging threats and new technologies will constitute a constant challenge and resource requirement. In the event the Company’s operating systems, wallets, or other information systems are hacked or compromised, any resulting theft or destruction of Token keys or related data could adversely affect an investment in the Tokens.

Investors understand that a private key, or a combination of private keys, is necessary to control and dispose of Tokens stored in any digital wallet or vault. Accordingly, any loss of requisite private key(s) associated with Investor’s digital wallet or vault storing Tokens will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet service, may be able to misappropriate Investor’s Tokens. Investor understands that any errors or malfunctions caused by or otherwise related to the digital wallet or vault Investor chooses to receive and store Tokens, including Investor’s own failure to properly maintain or use such digital wallet or vault, may also result in the loss of Tokens.

The Company and investors in the tokens will be heavily reliant upon third-party technology providers.

Due to audit and operational needs, as well as the use of the Securitize platform for the Offering, there will be individuals who have information regarding the Company’s security measures. Any of those individuals may purposely or inadvertently leak such information. To the extent service providers no longer support the Company or cannot be replaced, an investment in the Tokens may be adversely affected.

INVESTOR SUITABILITY

AN INVESTMENT IN THE COMPANY IS SUITABLE ONLY FOR INVESTORS OF SUBSTANTIAL FINANCIAL MEANS WHO HAVE NO NEED FOR LIQUIDITY IN THIS INVESTMENT. EACH PROSPECTIVE INVESTOR SHOULD CONSIDER WHETHER THE PURCHASE OF THE SECURITIES OFFERED HEREBY IS SUITABLE FOR IT IN LIGHT OF ITS INDIVIDUAL INVESTMENT OBJECTIVES.

The Company intends to generally solicit and advertise the Tokens to the U.S. Persons under Section 506(c) of Regulation D of the Securities Act and to non-U.S. Persons in offshore transactions pursuant to Regulation S and sell Tokens only to “eligible investors.” An “eligible investor” in the Company must be an “accredited investor” as defined in Rule 501(a) of Regulation D under the Securities Act. Investors will be required to verify their status as accredited investors through the provision of two (2) years of tax or wage statements, brokerage or bank statements, confirmation by certain third parties, and/or certain other methods deemed acceptable by the Company. Accredited investors are generally only those persons or entities coming within any one or more of the following categories:

Individual Investors

1. Any natural person whose individual net worth, or joint net worth with that person’s spouse, at the time of such Investor’s purchase, exceeds \$1,000,000, excluding the value of your primary residence and excluding any indebtedness that is secured by your primary residence, up to the estimated fair market value of the primary residence at the time of the sale of the Units (except that if the amount of such indebtedness outstanding at the time of sale of the Units exceeds the amount outstanding 60 days before such time, other than as a result of the acquisition of the primary residence, the amount of such excess shall be included as a liability);
2. Any natural person who had an individual income in excess of \$200,000 in each of the two most recent years or joint income with that person’s spouse in excess of \$300,000 in each of those years and has a reasonable expectation of reaching the same income level in the current year;
3. Any natural person who currently holds in good standing one of the following certifications or designations administered by the Financial Industry Regulatory Authority, Inc. (“**FINRA**”): (1) the Licensed General Securities Representative (Series 7); (2) the Licensed Investment Adviser Representative (Series 65); or (3) the Licensed Private Securities Offerings Representative (Series 82);
4. Any natural person who meets the definition of a “knowledgeable employee,” as defined in Rule 3c-5 under the Investment Company Act of 1940, as amended (the “**Investment Company Act**”);

Trusts, Partnerships, Companies and Other Entities:

5. Any organization described in Section 501(c)(3) of the Internal Revenue Code (the "**Code**"), corporation, Massachusetts or similar business trust, or partnership, not formed for the specific purpose of acquiring the securities offered, with total assets in excess of \$5,000,000;
6. Any trust, with total assets in excess of \$5,000,000, not formed for the specific purpose of acquiring the securities offered, whose purchase is directed by a sophisticated person as described in Rule 506(b)(2)(ii) under the Securities Act;
7. Any private business development company as defined in Section 202(a)(22) of the Investment Advisers Act of 1940, as amended (the "**Advisers Act**");
8. Any entity which owns more than \$5,000,000 in "investments," as defined in Rule 2a51-1(b) under the Investment Company Act, not formed for the specific purpose of acquiring the securities offered;
9. Any family office, as defined in rule 202(a)(11)(G)-1 under the Advisers Act, which has in excess of \$5,000,000 in assets under management and was not formed for the specific purpose of acquiring the securities offered, provided the investment in the securities offered by a person with such knowledge and experience in financial and business matters that the family office is capable of evaluating the merits and risks of the prospective investment. "Family clients" of a family office that meets these requirements will also qualify as accredited investors, provided that the family clients' investments are directed by such family office;
10. Any state-registered investment adviser or investment adviser exempt from the Securities and Exchange Commission (the "**SEC**") registration under Section 203(m) or Section 203(l) of the Advisers Act;
11. Any rural business investment company, as defined in Section 384A of the Consolidated Farm and Rural Development Act;

Financial Institutions:

12. Any bank as defined in Section 3(a)(2) of the Securities Act, or any savings and loan association or other institution as defined in Section 3(a)(5)(A) of the Securities Act; any broker or dealer registered pursuant to Section 15 of the Securities Exchange Act of 1934, as amended (the "**Exchange Act**");
13. Any insurance company as defined in Section 2(13) of the Securities Act; any investment company registered under the Investment Company Act, or Business Development Company as defined in Section 2(a)(48) of that Act;
14. Any Small Business Investment Company licensed by the U.S. Small Business Administration under Section 301(c) or (d) of the Small Business Investment Act of 1958

Other:

15. Any entity in which all of the equity owners are accredited investors (or, in the case of a trust, all the income beneficiaries) are accredited investors. If only this statement 15 has been checked, please have each equity owner (or, in the case of a trust, each income beneficiary) fill out the Investor Questionnaire. Please feel free to make copies of these pages for each equity owner (or income beneficiary)

The Company reserves the right to reject subscriptions in its sole discretion. Each purchaser will be required to: (i) provide supporting documents that verify such purchaser's accreditation status; (ii) represent that such purchaser's overall commitment to investments which are not readily marketable is not disproportionate to such purchaser's net worth; (iii) represent that such purchaser's investment in the Company will not cause such overall commitment to become excessive; (iv) represent that such purchaser can sustain a complete loss of such purchaser's investment in the Company and has no need for liquidity in such purchaser's investment in the Company; (v) represent that such purchaser has evaluated and understands the risks of investing in the Company; and (vi) acknowledge that such purchaser bears the risk of any change in value of an in-kind contribution between the date that such in-kind contribution was transferred to the Company and the date of such purchaser's acceptance to the Company.

Rule 506(d) of Regulation D of the Securities Act provides for disqualification of a Rule 506 offering in the event 20% or more of the Company's Tokens are beneficially owned by an investor involved in a "disqualifying event" (a "**Bad Actor Event**"). A prospective investor subject to a Bad Actor Event may be denied admittance to the Company in the Company's sole discretion. An existing shareholder must inform the Company immediately upon being subject to a Bad Actor Event. The Company may remove such shareholder from the Company at its sole discretion.

The following eight infractions constitute Bad Actor Events:

1. Conviction, within ten years before the sale of the securities (or five years, in the case of issuers, their predecessors and affiliated issuers), of any felony or misdemeanor: in connection with the purchase or sale of any security; involving the making of any false

filing with the SEC; or arising out of the conduct of the business of an underwriter, broker, dealer, municipal securities dealer, investment adviser or paid solicitor of purchasers of securities;

2. Being subject to any order, judgment or decree of any court of competent jurisdiction, entered within five years before the sale of the securities, that, at the time of such sale, restrains or enjoins the Member from engaging or continuing to engage in any conduct or practice: in connection with the purchase or sale of any security; involving the making of any false filing with the SEC; or arising out of the conduct of the business of an underwriter, broker, dealer, municipal securities dealer, investment adviser or paid solicitor of purchasers of securities.
3. Being subject to a final order of a state securities commission (or an agency or officer of a state performing like functions); a state authority that supervises or examines banks, savings associations, or credit unions; a state insurance commission (or an agency or officer of a state performing like functions); an appropriate federal banking agency; the Commodity Futures Trading Commission; or the National Credit Union Administration that, at the time of the sale of the securities, bars the Member from: association with an entity regulated by such commission, authority, agency or officer; engaging in the business of securities, insurance or banking; or engaging in savings association or credit union activities; or constitutes a final order based on a violation of any law or regulation that prohibits fraudulent, manipulative, or deceptive conduct entered within ten years before the sale of securities.
4. Being subject to an order of the SEC entered pursuant to section 15(b) or 15B(c) of the Exchange Act or section 203(e) or 203(f) of the Advisers Act that, at the time of the sale of the securities: suspends or revokes the Member's registration as a broker, dealer, municipal securities dealer, municipal securities dealer or investment adviser; places limitations on the activities, functions or operations of, or imposes civil money penalties on such person; or bars the Member from being associated with any entity or from participating in the offering of any penny stock.
5. Being subject to any order of the SEC, entered within five years before the sale of the securities, that, at the time of such sale, orders the Member to cease and desist from committing or causing a future violation of: any scienter-based anti-fraud provision of the federal securities laws, including, but not limited to, Section 17(a)(1) of the Securities Act, Section 10(b) of the Exchange Act and Rule 10b-5 thereunder, and Section 206(1) of the Advisers Act or any other rule or regulation thereunder, or Section 5 of the Securities Act.
6. Being suspended or expelled from membership in, or suspended or barred from association with a member of, a securities self-regulatory organization (e.g., a registered national securities exchange or a registered national or affiliated securities association) for any act or omission to act constituting conduct inconsistent with just and equitable principles of trade.
7. Having filed (as a registrant or issuer), or having been named as an underwriter in any registration statement or Regulation A offering statement filed with the SEC that, within five years before the sale of the securities, was the subject of a refusal order, stop order, or order suspending the Regulation A exemption, or is, at the time of the sale of the securities, the subject of an investigation or proceeding to determine whether a stop order or suspension order should be issued; or
8. Being subject to a United States Postal Service false representation order entered within five years before the sale of the securities, or, at the time of the sale of the securities, being subject to a temporary restraining order or preliminary injunction with respect to conduct alleged by the United States Postal Service to constitute a scheme or device for obtaining money or property through the mail by means of false representations.

TRANSFER AGENT

The Company has engaged Natracoin (Pty) Ltd. as its Transfer Agent with respect to the Offering of the Tokens. Investors must comply with the requirements set by the Transfer Agent prior to the sale of the Tokens. The Company and its Transfer Agent reserves the right to reject, either in whole or in part, any Investor's subscription, for any reason, and each prospective investor is subject to the Company and/or its Transfer Agent's determination whether the prospective investor meets the requirements under the section titled, "Investor Requirements."

TAX CONSIDERATIONS

THE FOLLOWING DISCUSSION OF U.S. FEDERAL INCOME TAX CONSIDERATIONS IS NOT INTENDED AS A SUBSTITUTE FOR CAREFUL TAX PLANNING. IT DOES NOT ADDRESS ALL OF THE RELEVANT TAX PRINCIPLES THAT WILL APPLY TO EACH INVESTOR. PROSPECTIVE INVESTORS ARE URGED TO CONSULT THEIR PROFESSIONAL ADVISORS REGARDING THE POSSIBLE TAX CONSEQUENCES PURCHASING THE SECURITIES OFFERED IN THIS OFFERING IN LIGHT OF THEIR OWN SITUATIONS.

Classification of the Company as Partnership

The Managing Members intend the Company to be treated as a partnership for federal income tax purposes. Subject to the discussion set forth below, a business (such as the Company) that has two or more members and that is not organized as a corporation under federal or state law will generally be classified as a partnership for U.S. federal income tax purposes.

An entity that would otherwise be classified as a partnership for U.S. federal income tax purposes may nonetheless be taxable as a corporation if it is a publicly traded partnership (a “PTP”). For this purpose, a partnership is “publicly traded” if its interests are traded on an established securities market or are readily tradable in a secondary market (or the substantial equivalent thereof). The Managing Members intend to operate the Company so that the Tokens will not be traded on an established securities market, but the Tokens may be readily tradable in a secondary market and, therefore, the Company may be treated as a PTP taxable as a corporation unless it qualifies under a separate exemption.

One of the available safe harbors to PTP treatment is the “private placement” safe harbor. Under this safe harbor, a partnership would not be treated as a PTP if (i) all interests in the partnership are issued in a transaction (or transactions) that is (are) not required to be registered under the Securities Act; and (ii) the partnership does not have more than 100 direct (and, under certain circumstances upon the application of a special “anti-avoidance” rule, indirect) partners at any time during the taxable year of the partnership (the “**Private Placement Safe Harbor**”). The Company believes that it may be eligible for the Private Placement Safe Harbor.

Finally, in general, a partnership that would otherwise qualify as a PTP would not be so treated for any taxable year if the partnership satisfies the gross income requirement of Code Section 7704(c)(2) for such taxable year and each preceding taxable year beginning after December 31, 1987 during which the partnership (or any predecessor) was in existence. A partnership meets this requirement if at least ninety percent (90%) of the partnership’s gross income for a taxable year is comprised of one or more of the following types of income (the “**7704 Qualifying Income Requirement**”): (i) interest; (ii) dividends; (iii) real property rents (within the meaning of Code Section 7704(d)(3)); (iv) income that would qualify under Code Sections 851(b)(2)(A) and 856(c)(2) – generally, income that constitutes “qualifying income” for purposes of applying the “regulated investment company” and “real estate investment trust” ninety percent (90%) gross income test; (v) gain from the sale or other disposition of real property (including property described in Code Section 1221(a)(1)); and (vi) gain from the sale or disposition of a capital asset (or property described in Code Section 1231(b)) held for the production of 7704 Qualifying Income. To the extent that the Company makes equity investments in entities treated as partnerships for tax purposes then the Company will likely generate operating income, and, accordingly, such income will not be qualifying income for purposes of meeting the 7704 Qualifying Income Requirement. If, and to the extent that, the Company makes equity investments in entities treated as C-corporations, however, then the income earned by the Company will likely consist mainly of capital gains and dividends, each of which are qualifying income for purposes of satisfying the 7704 Qualifying Income Requirement. Further, if and to the extent that, the Company leases its real estate properties, then the rents collected and earned by the Company will likely be considered qualifying income for purposes of satisfying the 7704 Qualifying Income Requirement. As of the date of this Memorandum, there can be no guarantee that the Company will make investments that generate qualifying income for purposes of satisfying the 7704 Qualifying Income Requirement.

No ruling has been or will be requested from the IRS on the issue of whether the Company is a PTP and no assurance can be given that the IRS or a court will concur with the Company’s position that it is not a PTP. If, notwithstanding the above discussion, the Company were to be treated as a corporation, rather than as a partnership for U.S. federal income tax purposes, its income would be subject to U.S. federal corporate income tax at a rate of 21%. In addition, distributions made by the Company would be taxed as dividends or otherwise treated as corporate distributions, and there would be no flow-through of items of income, gain, loss, and deduction. The discussion below assumes that the Company will not be a PTP and will be treated as a partnership for U.S. federal income tax purposes.

Taxation of U.S. Members

Taxation of Company Operations - Generally.

The Bylaws provides that items of income, deduction, gain, loss, or credit actually recognized by the Company for each fiscal year generally are to be allocated for income tax purposes among the Members pursuant to the principles of Treasury Regulations issued under Sections 704(b) and 704(c) of the Code. The Managing Members believe that such allocations satisfy the principles set forth in Sections 704(b) and 704(c) of the Code. However, there can be no assurance that the particular methodology of allocations used by the Company will be accepted by the IRS. If it were determined by the IRS that an allocation made by the Company with respect to a particular item did not have “substantial economic effect” (within the meaning of the Code and Treasury Regulations) and was not in accordance with the Members’ interests in the Company, taking into account all the facts and circumstances, that item could be allocated, for tax purposes, in a different manner. In some circumstances, this could result in a Member recognizing a greater or lesser amount of loss, deduction, gain or income than the Member would have recognized under the allocation made by the Company or in such Member recognizing an amount of loss, deduction, gain or income at a different time than would have been recognized under the allocation made by the Company. Each Member will be subject to tax on the Member’s distributive share of the Company’s taxable income or loss regardless of whether there has been any distribution of cash from the Company.

Since it is taxed as a partnership for U.S. tax purposes, the Company will not be subject to U.S. federal income tax. The Company will file an annual partnership information return with the IRS which will report the results of operations. Generally, any entity in which the Company invests will be classified for U.S. federal income tax purposes either as a partnership or a corporation. The Company will be required to report on its own tax return its distributive shares of net long-term capital gain or loss, net short-term capital gain or loss, net ordinary income or deduction, and various other categories of income, gain, loss, deduction, and credit of each partnership in which it invests. The Company will not have to report on its own tax return any portion of income, gain, loss, deduction, and credit of any corporation in which the Company invests.

The Company, however, will have to report distributions of money or property from any such corporation, which distributions generally will be treated either as dividends or as capital gains or losses that in each case will be allocated to the Members. Such items of the Company will be allocated to each Member as described below.

Taxation of Temporary Investments.

The Company may make temporary investments in, among other things, money market accounts, certificates of deposits, and checking and savings accounts. Such temporary investments may generate interest income to the Company. A Member's allocable share of interest received by the Company as a result of such temporary investments will be taxed at ordinary income tax rates.

Taxation of Capital Contributions.

No gain or loss generally will be recognized by a Member upon the acquisition of an interest in the Company for cash. However, if appreciated property is contributed to the Company, and if the Company were deemed to be an "investment company" within the meaning of Section 721(b) of the Code, a gain would be recognized to the contributing Member at the time of the contribution. Prospective Members should consult their own tax advisors concerning this issue. Even if no gain were required to be recognized by a Member on the contribution of appreciated property to the Company, on a subsequent recognition of that appreciation by the Company due to a taxable disposition of the property, the amount of such appreciation generally would be taxed to the contributing Member for income tax purposes under Section 704(c) of the Code. The amount of such gain also could be taxed to the contributing Member if the appreciated property were subsequently distributed by the Company to a Member other than the contributing Member, or if other property were distributed by the Company to the contributing Member.

Tax Basis in Tokens.

In general, a Member's United States federal income tax basis in such Member's Tokens would equal the amount of money and the adjusted tax basis of other property contributed to the Company together with the Member's share of the Company's liabilities as determined under Code Section 752 and the Regulations thereunder: (A) increased by: (i) the Member's allocable share, if any, of the Company's income and gain and (ii) any increase in the Member's share of Company's liabilities as determined under Code Section 752 and the Regulations thereunder; and (B) decreased, but not below zero, by: (i) the amount of money and the adjusted tax basis of any other property distributed to the Member, (ii) the Member's allocable share, if any, of the Company's items of losses, deductions and non-deductible, non-capitalizable expenditures and (iii) any decrease in the Member's share of the Company's liabilities as determined under Code Section 752 and the Regulations thereunder.

Taxation of Distributions.

In general, a Member would recognize gain on a distribution that the Member receives from the Company (whether a non-liquidating or liquidating distribution) to the extent that the amount of money and the fair market value of those "marketable securities" required to be treated as "money" under Code Section 731(c) and the Regulations thereunder ("**731(c) Marketable Securities**") exceeds the Member's then adjusted United States federal income tax basis in its Tokens. In general, any such gain would be treated as capital gain or loss for United States federal income tax purposes if the Member has held its Tokens as a capital asset and as long-term capital gain if the Member has held its Tokens for more than one year, except, however, for the amount of any such gain that is required to be treated as ordinary gain under Section 751 of the Code and the Regulations thereunder – i.e., the portion of the distribution that is attributable to the Company's "inventory items which have substantially appreciated in value" (within the meaning of Code Sections 751(b)(1)(A)(ii), (b)(3) and (d)) ("**Substantially Appreciated Inventory**") and the Company's "unrealized receivables" (within the meaning of Code Sections 751(b)(1)(A)(i) and (c)) ("**Unrealized Receivables**"). For example, the recapture of prior depreciation claimed on tangible personal property (e.g., furniture and equipment) would constitute an Unrealized Receivable.

A distribution of money would also include any decrease in the Member's share of the Company's liabilities, as determined under Section 752 of the Code and the Regulations thereunder.

No loss would be recognized by a Member upon such Member's receipt of a distribution from the Company except where the distribution is a liquidating distribution consisting solely of money (but not including any 731(c) Marketable Securities), Unrealized Receivables and "inventory items" (as defined in Code Section 751(d)) ("**Inventory**"), in which case loss would be recognized to the extent of the excess (if any) of the Member's adjusted United States federal income tax basis in such Member's Tokens immediately before the distribution over the sum of: (x) the amount of money distributed, and (y) the United States federal income tax basis to the Member, as determined under Code Section 732, of any such Unrealized Receivables and Inventory. Any loss so recognized by a Member would constitute a loss (and a capital loss if the Tokens are held by the Member as a capital asset for United States federal income tax purposes) from the Member's sale or exchange of such Member's Tokens and a long-term capital loss if the Member has held its Tokens for more than one year.

Taxable Disposition of Tokens.

In general, if a Member disposes of all or any portion of such Member's Tokens in a sale or other taxable disposition, the Member will generally recognize gain or loss equal to the difference, if any, between the amount realized by the Member in such sale or other taxable disposition – and which would include the Member's share of the Company's liabilities at the time of such disposition, as determined under Code Section 752 and the Regulations thereunder – and the Member's adjusted United States federal income tax basis in the Tokens (or portion thereof) so sold or disposed of – and which would include the Member's share of the Company's liabilities at the time of such

disposition, as determined under Code Section 752 and the Regulations thereunder. Except for any gain or loss attributable to the Company's Inventory and Unrealized Receivables (which would constitute ordinary gain or loss for United States federal income tax purposes), such gain or loss should generally be capital gain or loss if the Tokens so sold or disposed of was held by the Member as a capital asset and long-term capital gain if the Member held such Tokens so sold or disposed of for more than one year.

The closing of the Company's taxable year also would occur with respect to a Member who terminates its entire interest. As a result, all income attributable to long-term appreciation of a Member's interest over several years could be taxable to that Member in the taxable year of such termination.

Basis Adjustment Election and Mandatory Tax Basis Adjustments.

Under the Bylaws and Section 754 of the Code, the Managing Members will have the authority to make certain tax elections with respect to the Company, including the authority to elect to adjust the basis of the Company's assets in connection with certain distributions to Members or certain transfers of interests in the Company. Such an election, if made, could affect the amount of a Member's distributive share of gain or loss recognized by the Company on a disposition of its assets. Although the Managing Members has no present intention of making an election under Section 754 of the Code, Section 754 adjustments may nevertheless be mandatory under certain circumstances and could affect the amount of a Member's distributive share of gain or loss recognized by the Company on a disposition of its assets. The Managing Members also will have the authority under the Bylaws to elect to treat the Company as an "electing investment partnership" and, as a result, to avoid making Section 754 adjustments that otherwise would be mandatory with respect to certain transfers. It is possible, however, that the Company will not be able to qualify as an electing investment partnership.

Partnerships are generally required to adjust the basis of their assets in connection with a transfer of an interest in the partnership if the partnership has a substantial built-in loss immediately after the transfer. A substantial built-in loss exists if: (i) the partnership's adjusted basis in its property exceeds the fair market value of the property by more than \$250,000 or (ii) the transferee, upon the transfer of an interest, would be allocated a net loss in excess of \$250,000 upon a hypothetical disposition by the partnership of all of its assets in a fully taxable transaction for cash equal to the assets' fair market value, immediately after the transfer of the interest (thus, even if such partnership has an overall gain up the sale of all of its assets, if the transferee would be allocated more than \$250,000 in losses as a result of its share of gain or loss with respect to particular assets, a mandatory basis adjustment would have to be made). If such basis adjustments are required in connection with the transfer of Tokens, they could impose significant accounting costs and complexities on the Company. The Company would not be required to make such basis adjustments if it is an "electing investment partnership"; in that event, a transferee Member's distributive share of losses would not be allowed except to the extent that such losses exceed the loss (if any) recognized by the transferor (or, in some cases, a prior transferor) on the transfer of the Tokens.

The Managing Member has not determined whether the Company will be eligible to, or will, make the election to be treated as an "electing investment partnership". Moreover, the Company intends to prohibit any transfer of Tokens that could trigger such a downward adjustment in the tax basis in its assets unless the Company has a Code Section 754 election in effect or intends to make such an election that would require such downward adjustment in any event. In addition, the Managing Members will be entitled to require that each Member, and any transferee of a Member's Tokens, provide the Managing Member with any information necessary to allow the Company to comply with its obligations under the rules described in this paragraph.

Tax Audits; Partnership Representative.

The Managing Members will act as the "partnership representatives" of the Company. The partnership representatives will have the authority, subject to certain restrictions, to act on behalf of the Company in connection with any administrative or judicial review of items of the Company's income, gain, loss, deduction, or credit. The Managing Members shall designate a person to serve as "designated individual" under the partnership audit rules.

A tax return preparer may not sign a return without itself incurring a penalty unless either in its view each position taken on such return is more likely than not to be sustained if challenged by the IRS or such position is separately disclosed on the return. The Company may adopt positions that require such disclosure, which may increase the likelihood the IRS will examine the Company's tax returns, or may forego otherwise valid reporting positions to avoid such disclosure, which may increase the tax payable by a Member.

Legislation was recently enacted that significantly changes the rules for U.S. federal income tax audits of partnerships. Such audits will continue to be conducted at the partnership level, however, unless a partnership qualifies for and affirmatively elects an alternative procedure, any adjustments to the amount of tax due (including interest and penalties) will be payable by the partnership. Under the alternative procedure, if elected, a partnership would issue information returns to persons who were partners in the audited year, who would then be required to take the adjustments into account in calculating their own tax liability, and the partnership would not be liable for the adjustments. If the Company is able to and in fact elects the alternative procedure for a given adjustment, the amount of taxes for which such persons will be liable will be increased by any applicable penalties and a special interest charge.

There can be no assurance that the Company will be eligible to make such an election or that it will, in fact, make such an election for any given adjustment. If the Company does not or is not able to make such an election, then (1) the then current Members, in the aggregate, could indirectly bear income tax liabilities in excess of the aggregate amount of taxes that would have been due had the Company elected the alternative procedure, and (2) a given Member may indirectly bear taxes attributable to income allocable to other Members or former Members, including taxes (as well as interest and penalties) with respect to periods prior to such Member's ownership of interests in the

Company. Accordingly, it is possible that a Member will bear tax liabilities unrelated to its ownership of interests in the Company. Amounts available for distribution to the Members may be reduced as result of the Company's obligations to pay any taxes associated with an adjustment.

The partnership representatives of the Company will be the only persons with the authority to act on behalf of the Company with respect to audits and certain other tax matters and may decide not to elect (or may be unable to elect) the alternative procedure for any particular adjustment. In addition, the Company and each Member will be bound by the actions taken by the partnership representatives on behalf of the Company during any audit or litigation proceeding concerning U.S. federal income taxes.

U.S. Tax-Exempt Members

Unrelated Business Taxable Income.

Income recognized by an organization exempt from United States federal income tax, including a qualified retirement plan (stock, bonus, pension, or profit-sharing plan described in Section 401(a) of the Code) or individual retirement account, is generally exempt from United States federal income tax. Section 511 of the Code, however, imposes a tax on such an organization's "unrelated trade or business income" ("UBTI").

In general, UBTI means the gross income derived by a tax-exempt organization from any unrelated trade or business (as defined in Section 513 of the Code) regularly carried on by it, less the deductions allowed which are directly connected with the carrying on of such trade or business, both computed with the modifications provided in Section 512(b) of the Code. Among these modifications is the exclusion from UBTI of certain types of passive investment income, including (among others) dividends, annuities, interest, royalties, and gains from the sale of securities unless such income is derived from "debt-financed property" (as defined in Section 514 of the Code). Further, if a trade or business regularly carried on by a partnership of which a tax-exempt organization is a member is an unrelated trade or business with respect to such organization, such organization in computing its UBTI shall, subject to the exceptions, additions and limitations contained in Code Section 512(b), include its share (whether or not distributed) of the partnership's gross income from such unrelated trade or business and its share of the partnership deductions directly connected with such gross income. However, if a tax-exempt organization is a shareholder of a corporation, then the unrelated trade or business of the corporation is not imputed to the tax-exempt organization. The Tax Act makes certain amendments to the computation of UBTI by disaggregating certain trades or businesses of the exempt taxpayer. A tax-exempt organization contemplating an investment in the Company is advised to consult with its tax advisor regarding the application of UBTI to such investment.

The Company may purchase investments using debt and, as a result, the investments of the Company will likely be treated as "debt-financed property" (under Section 514 of the Code) that generates UBTI. However, under the Bylaws, the Managing Member will be required to use reasonable efforts to conduct the affairs of the Company in a manner that does not cause the incurrence by any UBTI. The Bylaws further provides that the Managing Member will be treated as satisfying its obligations to avoid UBTI if the Managing Member offers the Members that are tax-exempt organizations the opportunity to invest in the Company's investments through "blocker corporations."

Accordingly, it is possible that the Company could realize income which would constitute unrelated business taxable income and, in that event, each tax-exempt U.S. Member would be subject to U.S. federal income tax on its share of such income and may be required to file a U.S. federal income tax return with respect to such income. In particular, the Company is permitted under the Bylaws to incur indebtedness in connection with its acquisitions.

Other Jurisdictions

This Memorandum does not attempt to summarize the potential tax consequences of investments that the Company may make in non-U.S. entities. Various non-U.S. taxing jurisdictions may impose withholding and other taxes in respect of dividends, interest, gains from disposition of investments and other income generated by such investments. These foreign taxes may not be fully deductible or creditable by Members for United States federal income tax purposes, particularly given the complex set of limitations and restrictions on the use of foreign tax credits. Prospective investors should consult their tax advisors regarding the potential consequences of non-U.S. investments.

ERISA CONSIDERATIONS

CIRCULAR 230 NOTICE. THE FOLLOWING NOTICE IS BASED ON U.S. TREASURY REGULATIONS GOVERNING PRACTICE BEFORE THE U.S. INTERNAL REVENUE SERVICE: (1) ANY U.S. FEDERAL TAX ADVICE CONTAINED HEREIN, INCLUDING ANY OPINION OF COUNSEL REFERRED TO HEREIN, IS NOT INTENDED OR WRITTEN TO BE USED, AND CANNOT BE USED, BY ANY TAXPAYER FOR THE PURPOSE OF AVOIDING U.S. FEDERAL TAX PENALTIES THAT MAY BE IMPOSED ON THE TAXPAYER; (2) ANY SUCH ADVICE IS WRITTEN TO SUPPORT THE PROMOTION OR MARKETING OF THE TRANSACTIONS DESCRIBED HEREIN (OR IN ANY SUCH OPINION OF COUNSEL); AND (3) EACH TAXPAYER SHOULD SEEK ADVICE BASED ON THE TAXPAYER'S PARTICULAR CIRCUMSTANCES FROM AN INDEPENDENT TAX ADVISOR.

THE FOLLOWING SUMMARY OF CERTAIN ASPECTS OF ERISA IS BASED UPON ERISA, JUDICIAL DECISIONS, DEPARTMENT OF LABOR REGULATIONS AND RULINGS IN EXISTENCE ON THE DATE HEREOF. THIS SUMMARY IS GENERAL IN NATURE AND DOES NOT ADDRESS EVERY ERISA ISSUE THAT MAY BE APPLICABLE TO THE COMPANY OR A PARTICULAR INVESTOR. ACCORDINGLY, EACH PROSPECTIVE INVESTOR SHOULD CONSULT WITH ITS OWN COUNSEL IN ORDER TO UNDERSTAND THE ERISA ISSUES AFFECTING THE COMPANY AND THE INVESTOR.

General

Persons who are fiduciaries with respect to a U.S. employee benefit plan or trust within the meaning of and subject to the provisions of ERISA (an “**ERISA Plan**”), an IRA or a Keogh plan subject solely to the provisions of the Code (an “**Individual Retirement Fund**”) should consider, among other things, the matters described below before determining whether to invest in the Company. ERISA imposes certain general and specific responsibilities on persons who are fiduciaries with respect to an ERISA Plan, including prudence, diversification, avoidance of prohibited transactions and compliance with other standards. In determining whether a particular investment is appropriate for an ERISA Plan, U.S. Department of Labor (“**DOL**”) regulations provide that a fiduciary of an ERISA Plan must give appropriate consideration to, among other things, the role that the investment plays in the ERISA Plan’s portfolio, taking into consideration whether the investment is designed reasonably to further the ERISA Plan’s purposes, the risk and return factors of the potential investment, the portfolio’s composition with regard to diversification, the liquidity and current return of the total portfolio relative to the anticipated cash flow needs of the ERISA Plan, the projected return of the total portfolio relative to the ERISA Plan’s funding objectives, and the limitation on the rights of Shareholders to withdraw all or any part of their Tokens or to transfer their Tokens. Before investing the assets of an ERISA Plan in the Company, a fiduciary should determine whether such an investment is consistent with its fiduciary responsibilities and the foregoing regulations. For example, a fiduciary should consider whether an investment in the Company may be too illiquid or too speculative for a particular ERISA Plan and whether the assets of the ERISA Plan would be sufficiently diversified. If a fiduciary with respect to any such ERISA Plan breaches its responsibilities with regard to selecting an investment or an investment course of action for such ERISA Plan, the fiduciary may be held personally liable for losses incurred by the ERISA Plan as a result of such breach.

Plan Assets Defined

ERISA and applicable DOL regulations describe when the underlying assets of an entity in which benefit plan investors (“Benefit Plan Investors”) invest are treated as “plan assets” for purposes of ERISA. Under ERISA, the term Benefit Plan Investors is defined to include an “employee benefit plan” that is subject to the provisions of Title I of ERISA, a “plan” that is subject to the prohibited transaction provisions of Section 4975 of the Code, and entities the assets of which are treated as “plan assets” by reason of investment therein by Benefit Plan Investors. Under ERISA, as a general rule, when an ERISA Plan invests assets in another entity, the ERISA Plan’s assets include its investment, but do not, solely by reason of such investment, include any of the underlying assets of the entity. However, when an ERISA Plan acquires an “equity interest” in an entity that is neither: (a) a “publicly offered security”; nor (b) a security issued by an investment fund registered under the Investment Company Act, then the ERISA Plan’s assets include both the equity interest and an undivided interest in each of the underlying assets of the entity, unless it is established that: (i) the entity is an “operating company”; or (ii) the equity participation in the entity by Benefit Plan Investors is limited. Under ERISA, the assets of an entity will not be treated as “plan assets” if Benefit Plan Investors hold less than 25% (or such higher percentage as may be specified in regulations promulgated by the DOL) of the value of each class of equity interests in the entity. Equity interests held by a person with discretionary authority or control with respect to the assets of the entity and equity interests held by a person who provides investment advice for a fee (direct or indirect) with respect to such assets or any affiliate of any such person (other than a Benefit Plan Investor) are not considered for purposes of determining whether the assets of an entity will be treated as “plan assets” for purposes of ERISA. The Benefit Plan Investor percentage of ownership test applies at the time of an acquisition by any person of the equity interests. In addition, an advisory opinion of the DOL takes the position that a redemption of an equity interest by an investor constitutes the acquisition of an equity interest by the remaining investors (through an increase in their percentage ownership of the remaining equity interests), thus triggering an application of the Benefit Plan Investor percentage of ownership test at the time of the redemption.

Limitation on Investments by Benefit Plan Investors

It is the current intent of the Board to monitor the investments in the Company to ensure that the aggregate investment by Benefit Plan Investors does not equal or exceed 25% of the value of any class of the Tokens (or such higher percentage as may be specified in regulations promulgated by the DOL) so that assets of the Company will not be treated as “plan assets” under ERISA. Tokens held by the Board and its affiliates are not considered for purposes of determining whether the assets of the Company will be treated as “plan assets” for the purpose of ERISA. If the assets of the Company were treated as “plan assets” of a Benefit Plan Investor, the Board would be a “fiduciary” (as defined in ERISA and the Code) with respect to each such Benefit Plan Investor, and would be subject to the obligations and liabilities imposed on fiduciaries by ERISA. In such circumstances, the Company would be subject to various other requirements of ERISA and the Code. In particular, the Company would be subject to rules restricting transactions with “parties in interest” and prohibiting transactions involving conflicts of interest on the part of fiduciaries which might result in a violation of ERISA and the Code unless the Company obtained appropriate exemptions from the DOL allowing the Company to conduct its operations as described herein. The Company reserves the right to require the withdrawal of all or part of the Tokens held by any Member, including, without limitation, to ensure compliance with the percentage limitation on investment in the Company by Benefit Plan Investors as set forth above.

Representations by Plans

An ERISA Plan proposing to invest in the Company will be required to represent that it is, and any fiduciaries responsible for the ERISA Plan's investments are, aware of and understand the Company's investment objectives, policies and strategies, and that the decision to invest plan assets in the Company was made with appropriate consideration of relevant investment factors with regard to the ERISA Plan and is consistent with the duties and responsibilities imposed upon fiduciaries with regard to their investment decisions under ERISA. WHETHER OR NOT THE ASSETS OF THE COMPANY ARE TREATED AS "PLAN ASSETS" UNDER ERISA, AN INVESTMENT IN THE COMPANY BY AN ERISA PLAN IS SUBJECT TO ERISA. ACCORDINGLY, FIDUCIARIES OF ERISA PLANS SHOULD CONSULT WITH THEIR OWN COUNSEL AS TO THE CONSEQUENCES UNDER ERISA OF AN INVESTMENT IN THE COMPANY.

ERISA Plans and Individual Retirement Funds Having Prior Relationships with the Board or its Affiliates

Certain prospective ERISA Plan and Individual Retirement Fund investors may currently maintain relationships with the Board or other entities that are affiliated with the Board. Each of such entities may be deemed to be a party in interest to and/or a fiduciary of any ERISA Plan or Individual Retirement Fund to which any of the Board or its affiliates provides investment management, investment advisory or other services. ERISA prohibits ERISA Plan assets to be used for the benefit of a party in interest and also prohibits an ERISA Plan fiduciary from using its position to cause the ERISA Plan to make an investment from which it or certain third parties in which such fiduciary has an interest would receive a fee or other consideration. Similar provisions are imposed by the Code with respect to Individual Retirement Funds. ERISA Plan and Individual Retirement Fund investors should consult with counsel to determine if participation in the Company is a transaction that is prohibited by ERISA or the Code. The provisions of ERISA are subject to extensive and continuing administrative and judicial interpretation and review. The discussion of ERISA contained herein is, of necessity, general and may be affected by future publication of regulations and rulings. Potential investors should consult with their legal advisors regarding the consequences under ERISA of the acquisition and ownership of Tokens.

Eligible Indirect Compensation

The disclosures set forth in this Memorandum constitute the Board's good faith efforts to comply with the disclosure requirements of Form 5500, Schedule C and allow for the treatment of its compensation as eligible indirect compensation.

SUBSCRIPTION PROCEDURES

Onboarding

To register, Investors must provide certain personal information and representations to verify their identity of each prospective investor, indicate their country and state of residence.

Prospective investors must also indicate and provide information supporting their accreditation status and complete anti-money laundering and know-your-customer processes. Prospective investors who provide incomplete or inaccurate information will not be permitted to purchase the securities of the Company, and the Company has the authority, in its sole discretion, to prohibit or refund purchases by prospective investors for any reason.

Once you complete the onboarding process, you will be added to the "whitelist" and have the opportunity to subscribe for the Tokens by:

- (i) executing the Subscription Agreement; and
- (ii) delivering payment to the Company via online portal per the instructions provided in the Subscription Agreement.

The whitelist is a list of approved persons or entities who have complied with requests for certain personal information and documentation to satisfy Company's obligations to combat money laundering. Initially, Tokens may only be sold or transferred to people or entities on the whitelist, subject to restrictions on transfer provided under applicable securities laws and in compliance with the restrictions set forth in the Organizational Documents. The Company may, but will not be required to, choose to list the Tokens on an alternative trading system to facilitate secondary trading of the Tokens.

Subscriptions are not binding on the Company until investor funds have cleared and are available, and the subscription has been accepted in writing by the Company. We will refuse any subscription by giving written notice to the prospective Investor via electronic notice to the e-mail address provided by Subscriber in the Subscription Agreement. We have the right to refuse to sell the Tokens to any prospective Investor for any reason in our sole discretion, including, without limitation, if such prospective Investor does not promptly supply all information requested by us in connection with such prospective Investor's subscription. In addition, in our sole discretion, we may establish a limit on the purchase of Tokens by a particular prospective Investor.

The execution of a Subscription Agreement by a prospective investor constitutes a binding offer to purchase the Tokens subscribed for. Once a prospective investor subscribes for the Tokens, that investor will not be able to withdraw such subscription.
